About / Disclaimer

This report is published under the **ZAFTYS Analytics** brand. All quantitative statements are intended to be grounded in a pinned Data Bank version. Gaps are disclosed rather than invented. Modeled series are decision support — not audited financial statements. Scenario bands, sensitivity ranges, and qualitative frameworks are labeled where evidence is incomplete. External publisher forecasts outside the study horizon are contextual only.

How to read this report

- **Exhibits** sit with captions and sources on the same page where possible.
- **Tables** use navy headers and teal accent rules for scanability.
- **Claims** are bank-grounded; unverified numbers are withheld.
- **Confidential** — authorized recipients only.

Bank logistics-institutional-220 · v

Horizon 2021-2026 history · forecast to 2036 · 2026-08-11

Evidence standard

Numeric claims prefer bank-verified sources. Where coverage is thin, the report states the gap instead of inventing precision.

Model spine

Market size, share, scenario, and sensitivity exhibits bind to the pinned model version for this bank.

Distribution

Prepared for authorized institutional recipients. Redistribution requires ZAFTYS Analytics approval.

1 Executive Summary & Growth Bridge

Global Logistics Market is modeled at USD 4,334.3 billion in 2026, expanding to USD 11,350.0 billion by 2036 at a base-case CAGR of 10.1% across the 2027-2036 forecast window (history backfill from 2021). [2]

The institutional spine compounds the 2026 ZAFYYS research-aligned anchor through a hybrid top-down / bottom-up triangulation, with regional and L2/L3 cuts held to evidenced share priors rather than undifferentiated residual splits. Asia-Pacific is the largest regional pool at 35.3% of modeled 2026 value. [1]

Global market size spine (selected years)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
North America	644	779	1036	1253	1516	1833	2217	2681	10.0%
Europe	562	674	884	1060	1270	1522	1824	2186	9.5%
Asia-Pacific	934	1138	1530	1864	2271	2767	3372	4108	10.4%
Middle East & Africa	267	327	442	541	661	808	989	1209	10.6%
Latin America	272	331	442	537	652	791	960	1166	10.2%

Source: ZAFYYS market databank 2027-2036

Key Visual Takeaways

- 2026 base USD 4,334.3 BN anchors the forward path [2].
- 2036 endpoint USD 11,350.0 BN implies ~10.1% CAGR [1].
- Asia-Pacific ~35.3% regional pool; NA/EU stay premium-density lanes.

2 Market Introduction & Scope

Scope spans service offering (L1-L3), end-use verticals, contract models, tech/fleet cuts, and five geographic theaters with 21 country deep-dives.

Taxonomy L1 service branches: Transportation; Warehousing & Storage; Freight Forwarding & Customs Brokerage; Value-Added Logistics Services (VALS).

Service offering L2 year grid (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	557	667	874	1046	1252	1499	1794	2146	9.4%
Ocean Freight (FCL, LCL)	306	364	473	564	671	799	950	1131	9.1%
Air Freight (Express, General Cargo)	178	217	291	355	431	525	639	777	10.3%
Rail Freight & Intermodal	113	137	182	220	267	323	390	472	10.0%
Ambient Warehousing	398	479	631	758	911	1095	1315	1579	9.6%
Temperature-Controlled / Cold Storage	212	263	364	452	561	697	865	1073	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	124	155	218	274	344	432	542	680	12.0%
Air & Ocean Freight Management	220	268	359	436	530	643	781	949	10.2%
Customs Clearance & Port Handling	155	188	250	302	364	440	532	642	9.9%
Multimodal Transport Orchestration	103	127	172	210	257	315	385	470	10.6%
Kitting, Packaging & Labeling	120	147	198	241	294	358	437	532	10.4%
Reverse Logistics & Returns Processing	111	137	187	231	285	351	432	532	11.0%
Quality Control & Assembly	82	100	135	165	202	246	301	367	10.5%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Transportation is the largest L1 pool (~42% prior); warehousing ~28%.
- Within transport, road leads; cold storage and ASRS densify warehouse leaves.
- VALS (kitting, reverse, QC) monetizes fulfillment complexity.

2.1 Taxonomy Tree — Service Offering

L1 Transportation splits into Road, Ocean, Air, and Rail/Intermodal L2 nodes; Warehousing into Ambient, Cold, and ASRS; Forwarding into Air/Ocean management, Customs, and Multimodal orchestration; VALS into kitting, reverse, and QC/assembly.

Service Offering Taxonomy Tree (L1 → L2)

Transportation Services

- Road Freight (FTL / LTL / Express)
- Ocean Freight (FCL / LCL)
- Air Freight (Express / General)
- Rail Freight & Intermodal

Warehousing & Storage

- Ambient Warehousing
- Temperature-Controlled / Cold Storage
- ASRS / Automated Nodes

Freight Forwarding & Customs

- Air & Ocean Freight Management
- Customs Clearance & Port Handling
- Multimodal Transport Orchestration

Value-Added Logistics (VALS)

- Kitting, Packaging & Labeling
- Reverse Logistics & Returns
- Quality Control & Assembly

Source: ZAFTYS taxonomy pack · L3 Core/Premium aliases inherit each L2 leaf

Key Visual Takeaways

- Institutional scope excludes pure software TAM unless tied to logistics ops.
- Country deep-dives inherit global priors scaled by national pools.
- Visual taxonomy / method exhibits bind the narrative to the databank spine.

2.2 Taxonomy Tree — Application Verticals

Retail & e-commerce (omnichannel + last-mile), Manufacturing (auto + high-tech), Healthcare (biologics + devices), Food & beverage (perishable + dry FMCG), and Oil/Gas/Chemicals (hazmat + project cargo) define the vertical demand lattice.

Application Verticals — Demand Lattice

Source: ZAFTYS application taxonomy · declining Core vs Growth-niche L3 weights

Key Visual Takeaways

- Institutional scope excludes pure software TAM unless tied to logistics ops.
- Country deep-dives inherit global priors scaled by national pools.
- Visual taxonomy / method exhibits bind the narrative to the databank spine.

2.3 Methodology Matrix

Top-down TAM from the pinned spine is triangulated with bottom-up lane and warehouse unit economics. Hybrid prefer-top-down is selected when claim coverage is incomplete; share priors prevent undifferentiated residual splits on named leaves.

Data Triangulation & Methodology Matrix

Primary Interviews Census notes by region & tier n≥5 methodology mix	Secondary Bank Claims Pinned spine + share priors Gap disclosure when thin	Econometric Path Top-down CAGR compounding 2026→2036 endpoint lock
Bottom-Up Pressure Volume × yield heuristics Warehouse throughput checks	Hybrid Prefer Top-Down When claim coverage incomplete Priors beat equal residuals	Reconciliation Material deltas labeled Scenario bands disclosed
Regulatory Overlay IMO / ETS / FMC cues Cost pass-through in ASP	Competitive Priors Named share vs fragment Capability matrix directional	Country Scaling National pool × mix Absolute spine shares

Source: ZAFTYS research methodology · hybrid prefer top-down

Key Visual Takeaways

- Institutional scope excludes pure software TAM unless tied to logistics ops.
- Country deep-dives inherit global priors scaled by national pools.
- Visual taxonomy / method exhibits bind the narrative to the databank spine.

2.4 Top-Down vs Bottom-Up

Top-down carries the 2026-2036 CAGR path. Bottom-up pressure-tests L2 pools using volume x yield heuristics for freight and throughput x revenue-per-pallet for warehousing. Material deltas are disclosed as reconciliation notes.

Top-Down Econometric vs Bottom-Up Volume Flow

Top-Down Path

1. Pin 2026 market spine
2. Compound to 2036 endpoint
3. Allocate L1/L2 via priors
4. Apply segment growth tilts

GDP / trade elasticity framing · endpoint locked

Bottom-Up Path

1. Freight volume × yield
2. Warehouse throughput × RPP
3. Vertical attach rates
4. Reconcile to spine pool

Pressure-test L2 pools · disclose material deltas

Hybrid rule: prefer top-down when claim coverage is incomplete; never invent equal residual splits on named leaves.

Key Visual Takeaways

- Institutional scope excludes pure software TAM unless tied to logistics ops.
- Country deep-dives inherit global priors scaled by national pools.
- Visual taxonomy / method exhibits bind the narrative to the databank spine.

3 Market Dynamics & Regulations

Dynamics chapter frames drivers, restraints, regulatory overlays, and competitive forces for the 2027-2036 logistics horizon. The sequence moves from demand and cost drivers into policy/compliance constraints, then competitive structure — so later quantitative chapters inherit a labeled force set rather than unexplained CAGR residuals.

Readers should treat each force page as a decision filter: which corridors, modes, and contract models are most exposed; which regulatory regimes reprice capacity; and where 3PL vs shipper-owned networks absorb the shock. Quantified spine impacts remain in the year-grid chapters that follow.

Market Dynamics — Relative Impact Rating

Source: ZAFTYS model frames · native Typst (cetz-plot barchart)

Key Visual Takeaways

- Drivers densify e-commerce, cold chain, and nearshore corridors.
- Restraints cluster around labor, fuel/carbon, and customs friction.
- Porter and regulatory pages bound competitive intensity before profiles.

3.1 Drivers

Structural drivers include nearshoring corridors, e-commerce parcel density, pharma cold-chain compliance, and network redesign after Red Sea / canal shocks. Warehouse automation (ASRS/AMR) and digital booking raise switching costs for shippers.

Key Drivers — Impact & Urgency (1–10)

Source: ZAFTYS model frames · native Typst (cetz-plot barchart)

Key Visual Takeaways

- Nearshoring raises Mexico/CEE lane density.
- Parcel and grocery last-mile remain volume engines.
- Cold-chain compliance spend is sticky through 2036.

3.2 Restraints

Restraints remain truck driver shortages, warehouse labor inflation, uneven digital booking penetration outside tier-1 shippers, and capex cycles for fleet renewal under carbon intensity rules.

Restraints — Severity & Friction (1–10)

Source: ZAFTYS model frames · native Typst (cetz-plot barchart)

Key Visual Takeaways

- Labor is the binding operating constraint in mature markets.
- Fuel and carbon overlays widen asset-heavy vs asset-light wedges.
- SME shippers adopt visibility stacks slower than enterprise accounts.

3.3 Regulatory Overlay

Regulatory overlays: IMO 2024 GHG/CII, EU ETS maritime cost pass-through, CBAM logistics friction, FMC alliance oversight, and bunker/ASP volatility. National customs digitization programs also reshape brokerage yields.

Global Regulatory Timeline & Compliance Impact

Regime	Scope	Impact	Operating implication
IMO 2024 CII / GHG	Ocean	High	Fleet renewal & slow-steaming cost pass-through
EU ETS Maritime	Europe trades	High	Slot cost uplift in landed-cost models
EU CBAM Logistics	EU imports	Med	Documentation friction on embedded emissions
US FMC Oversight	Transpacific / TA	Med	Alliance capacity discipline & surcharges
National Customs Digitisation	All theaters	Med	Brokerage yield & clearance cycle time

Source: ZAFTYS research · regulator primary sources (IMO / EU / FMC)

Key Visual Takeaways

- Policy cost pass-through is now a pricing variable.
- ETS/CBAM show up in landed-cost models, not only sustainability decks.
- FMC oversight keeps alliance capacity discipline in focus.

3.4 PESTLE Snapshot

Political corridor risk, economic inventory cycles, social labor demographics, technological automation, legal customs modernization, and environmental carbon pricing jointly set the operating envelope for 2027-2036.

PESTLE Snapshot — Operating Envelope

Political

Corridor risk, alliance oversight, customs modernization

Economic

Inventory cycles, freight rate regimes, ASP stickiness

Social

Driver / warehouse labor demographics & wage pressure

Technological

WMS/TMS, ASRS/AMR, visibility twins, autonomy pilots

Legal

FMC / customs digitization / hazmat permitting

Environmental

IMO CII, EU ETS maritime, CBAM landed-cost overlays

Source: ZAFTYS research diligence frame · checklist, not a numeric scorecard

Key Visual Takeaways

- PESTLE is used as a diligence checklist, not a scorecard substitute.
- Environmental cost is increasingly contractualized in RFPs.
- Technology spend concentrates in WMS/TMS and yard automation.

3.5 Porter Five Forces Read-Through

Buyer power is elevated among global shippers; supplier power sits with scarce capacity owners in peak seasons; rivalry is intense in forwarding; substitutes include asset-light digital brokers; new entrants face network moats.

Porter's Five Forces — Logistics Market System

KEY VISUAL TAKEAWAYS

- ▶ Rivalry and buyer power dominate soft ocean markets.
- ▶ Contract logistics escapes pure price rivalry via automation and vertical expertise.

Key Visual Takeaways

- Forwarding rivalry stays price-visible in soft ocean markets.
- Contract logistics differentiation is automation and vertical expertise.
- Express networks retain densest brand moats.

3.6 SWOT — Market System

Strengths: network density and multimodal optionality. Weaknesses: labor dependence and carbon intensity. Opportunities: automation, nearshoring, healthcare cold chain. Threats: trade shocks, fuel spikes, and digital disintermediation.

SWOT — Market System

Strengths

- Network density & multimodal optionality
- Contract logistics productivity moats
- Express brand / gateway control

Weaknesses

- Labor dependence in warehouses
- Carbon intensity of asset fleets
- Cycle exposure in ocean/air spot

Opportunities

- ASRS / AMR automation attach
- Nearshoring corridor densification
- Healthcare cold-chain compliance

Threats

- Trade & canal shocks
- Fuel / ETS cost spikes
- Digital brokerage disintermediation

Key Visual Takeaways

- SWOT is a briefing frame for diligence workshops.
- Automation converts labor weakness into capex opportunity.
- Trade shocks re-price corridor reliability premiums.

3.7 Pricing & ASP / Fuel Volatility

ASP and bunker volatility transmit into ocean/air surcharges and truckload fuel floats. Contract logistics ASPs are stickier, tied to productivity SLAs and value-added attach rates rather than spot freight indices.

Ocean / Air Spot Volatility vs Contract Surcharge Index (2021=100)

Source: ZAFTYS model frames · native Typst (cetz-plot)

Key Visual Takeaways

- Surcharge regimes remain the primary ASP shock absorber.
- Value-added attach lifts warehouse yield without volume growth.
- Shippers increasingly demand carbon-adjusted landed cost views.

3.8 Patent & Innovation Themes

Innovation clusters around warehouse robotics, visibility twins, autonomous yard/linehaul pilots, and cold-chain integrity sensors. Patent density is a leading indicator for automation suppliers adjacent to logistics operators.

Patent Cluster Shares — Logistics Tech Adjacencies

Source: ZAFTYS research · patent cluster synthesis

Key Visual Takeaways

- Operators buy innovation via partners more than captive R&D.
- Visibility twins are becoming RFP hygiene, not differentiators alone.
- Cold-chain integrity tech supports pharma compliance premiums.

4 Global Market by Service Offering

Offering cuts bind L2 nodes to the global spine. Each year-grid uses 2021/2023/2026/2028/2030/2032/2034/2036 columns plus window CAGR. Dedicated leaf pages below pair each L2 size path with a CeTZ trajectory chart and analyst lessons so single-segment exhibits are publication-dense.

Service offering L2 year grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	557	667	874	1046	1252	1499	1794	2146	9.4%
Ocean Freight (FCL, LCL)	306	364	473	564	671	799	950	1131	9.1%
Air Freight (Express, General Cargo)	178	217	291	355	431	525	639	777	10.3%
Rail Freight & Intermodal	113	137	182	220	267	323	390	472	10.0%
Ambient Warehousing	398	479	631	758	911	1095	1315	1579	9.6%
Temperature-Controlled / Cold Storage	212	263	364	452	561	697	865	1073	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	124	155	218	274	344	432	542	680	12.0%
Air & Ocean Freight Management	220	268	359	436	530	643	781	949	10.2%
Customs Clearance & Port Handling	155	188	250	302	364	440	532	642	9.9%
Multimodal Transport Orchestration	103	127	172	210	257	315	385	470	10.6%
Kitting, Packaging & Labeling	120	147	198	241	294	358	437	532	10.4%
Reverse Logistics & Returns Processing	111	137	187	231	285	351	432	532	11.0%
Quality Control & Assembly	82	100	135	165	202	246	301	367	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- L2 priors are unequal (road/ambient lead; VALS is thinner but yield-rich).
- Each following leaf page includes table + mini line + analyst lessons.
- L3 detail grids split Core vs Premium/Express with declining weights.

4.1 Service Offering Detail Grid 1

Service L3 year grid (part 1)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %

- This page covers: Quality Control & Assembly · Core; Quality Control & Assembly · Premium / Express.
- Within this set, Quality Control & Assembly · Core anchors the larger base pool; Premium/Express aliases densify yield.
- L3 inherits parent L2 share, then uses a declining Core vs Premium split (not a flat residual).

4.6 Road Freight (FTL, LTL, Express)

Road Freight (FTL, LTL, Express) holds approximately 20.2% of modeled 2026 global logistics spend (USD 873.8 billion).

Road Freight (FTL, LTL, Express) — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	550	662	874	1051	1265	1522	1832	2205	9.7%

Source: ZAFTYS market databank 2027-2036

Road Freight (FTL, LTL, Express) — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Road Freight (FTL, LTL, Express) is a 20.2% slice of the 2026 spine (USD 873.8 BN) with path CAGR 9.7%.
- By 2036 the tilted path reaches about USD 2,204.5 BN — use corridor evidence before overriding the prior.
- Pair this leaf with regional deep-dives: mode mix and labor/carbon frictions bend realized growth vs the grid.

4.7 Ocean Freight (FCL, LCL)

Ocean Freight (FCL, LCL) holds approximately 10.9% of modeled 2026 global logistics spend (USD 473.3 billion).

Ocean Freight (FCL, LCL) — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Project & Oversized Cargo — Core	59	71	92	110	132	157	187	223	9.2%
Project & Oversized Cargo — Growth niche	30	35	46	55	66	79	94	112	9.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Vertical leaves on this page: Project & Oversized Cargo · Core; Project & Oversized Cargo · Growth niche.
- Lead leaf on this grid: Project & Oversized Cargo · Core; Growth-niche aliases capture thinner but faster pockets.
- Application L3 inherits L2 priors with Core vs Growth-niche declining weights.

5.5 Omnichannel Fulfillment

Omnichannel Fulfillment is modeled at 15.6% of 2026 global logistics value (USD 677.9 billion).

Omnichannel Fulfillment — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	400	494	678	837	1033	1275	1575	1944	11.1%

Source: ZAFTYS market databank 2027-2036

Omnichannel Fulfillment — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Omnichannel Fulfillment accounts for 15.6% of modeled 2026 logistics value (USD 677.9 BN).
- Vertical CAGR 11.1% compounds to ~USD 1,944.0 BN by 2036 under the databank tilt.
- Diligence focus: compliance intensity, SKU/temperature complexity, and 3PL attach rates in this vertical.

5.6 Last-Mile Parcel Delivery

Last-Mile Parcel Delivery is modeled at 18.4% of 2026 global logistics value (USD 795.8 billion).

Last-Mile Parcel Delivery — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Last-Mile Parcel Delivery	461	574	796	990	1231	1530	1903	2366	11.5%

Source: ZAFTYS market databank 2027-2036

Last-Mile Parcel Delivery — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Last-Mile Parcel Delivery accounts for 18.4% of modeled 2026 logistics value (USD 795.8 BN).
- Vertical CAGR 11.5% compounds to ~USD 2,366.4 BN by 2036 under the databank tilt.
- Diligence focus: compliance intensity, SKU/temperature complexity, and 3PL attach rates in this vertical.

5.7 Automotive & Heavy Machinery

Automotive & Heavy Machinery is modeled at 16.5% of 2026 global logistics value (USD 715.2 billion).

Automotive & Heavy Machinery — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Automotive & Heavy Machinery	448	540	715	862	1039	1253	1511	1821	9.8%

Source: ZAFTYS market databank 2027-2036

Automotive & Heavy Machinery — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Automotive & Heavy Machinery accounts for 16.5% of modeled 2026 logistics value (USD 715.2 BN).
- Vertical CAGR 9.8% compounds to ~USD 1,821.0 BN by 2036 under the databank tilt.
- Diligence focus: compliance intensity, SKU/temperature complexity, and 3PL attach rates in this vertical.

5.8 High-Tech & Electronics

High-Tech & Electronics is modeled at 13.5% of 2026 global logistics value (USD 585.1 billion).

High-Tech & Electronics — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
High-Tech & Electronics	352	431	585	717	879	1077	1320	1618	10.7%

Dry Food & FMCG Distribution — 10-year trajectory (USD billion)

Source: ZAFITYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Dry Food & FMCG Distribution accounts for 6.2% of modeled 2026 logistics value (USD 267.0 BN).
- Vertical CAGR 10.2% compounds to ~USD 705.3 BN by 2036 under the databank tilt.
- Diligence focus: compliance intensity, SKU/temperature complexity, and 3PL attach rates in this vertical.

5.13 Hazmat Transport & Storage

Hazmat Transport & Storage is modeled at 4.8% of 2026 global logistics value (USD 208.0 billion).

Hazmat Transport & Storage — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Hazmat Transport & Storage	127	155	208	254	309	377	459	560	10.4%

Source: ZAFTYS market databank 2027-2036

Hazmat Transport & Storage — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Hazmat Transport & Storage accounts for 4.8% of modeled 2026 logistics value (USD 208.0 BN).
- Vertical CAGR 10.4% compounds to ~USD 559.7 BN by 2036 under the databank tilt.
- Diligence focus: compliance intensity, SKU/temperature complexity, and 3PL attach rates in this vertical.

5.14 Project & Oversized Cargo

Project & Oversized Cargo is modeled at 3.2% of 2026 global logistics value (USD 138.7 billion).

Project & Oversized Cargo — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Project & Oversized Cargo	86	104	139	168	203	246	297	360	10.0%

Source: ZAFTYS market databank 2027-2036

Project & Oversized Cargo — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Project & Oversized Cargo accounts for 3.2% of modeled 2026 logistics value (USD 138.7 BN).
- Vertical CAGR 10.0% compounds to ~USD 359.7 BN by 2036 under the databank tilt.
- Diligence focus: compliance intensity, SKU/temperature complexity, and 3PL attach rates in this vertical.

6 Global Market by Tech & Fleet

Fleet and software monetization covers road/ocean/air/rail capacity plus EV vans, autonomous pilots, and WMS/TMS stacks.

Tech & fleet year grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	1098	1318	1734	2080	2494	2989	3580	4287	9.5%
Ocean Fleet & Chartering	612	731	954	1138	1357	1617	1926	2293	9.2%
Air Cargo Capacity	370	451	607	739	899	1093	1329	1615	10.3%
Rail & Intermodal	268	325	433	525	635	768	929	1122	10.0%
EV Vans & Green Fleet	141	180	260	332	425	542	692	883	13.0%
Autonomous Freight Pilots	68	88	130	168	217	280	361	466	13.6%
WMS / TMS Software Stack	121	153	217	273	344	433	545	685	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Road remains the volume backbone; ocean holds deep-sea value.
- EV vans, autonomous pilots, and WMS/TMS carry above-spine growth tilts.

6.1 Road Freight Fleet

Road remains the volume backbone for door-to-door and first/last-mile legs. Spend covers asset fleets, dedicated contract capacity, and brokered TL/LTL. Modeled 2026 reference is USD 1,733.7 billion (40.0% of global logistics spend).

Road Freight Fleet — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	1086	1310	1734	2090	2520	3038	3662	4415	9.8%

Source: ZAFITYS market databank 2027-2036

Road Freight Fleet — 10-year trajectory (USD billion)

Source: ZAFITYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Road Freight Fleet is modeled at 40.0% of global spend (USD 1,733.7 BN in 2026).
- Trajectory CAGR 9.8% implies ~USD 4,414.5 BN by 2036 as an overlay on physical capacity.
- Treat software/EV/autonomy leaves as adoption overlays — not a substitute for road/ocean/air volume.

6.2 Ocean Fleet & Chartering

Ocean monetizes deep-sea container and bulk adjacency plus chartering/agency overlays that move with freight-rate cycles and alliance capacity discipline. Modeled 2026 reference is USD 953.5 billion (22.0% of global logistics spend).

Ocean Fleet & Chartering — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Ocean Fleet & Chartering	606	726	954	1143	1371	1643	1970	2362	9.5%

Source: ZAFTYS market databank 2027-2036

Ocean Fleet & Chartering — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Ocean Fleet & Chartering is modeled at 22.0% of global spend (USD 953.5 BN in 2026).
- Trajectory CAGR 9.5% implies ~USD 2,361.8 BN by 2036 as an overlay on physical capacity.
- Treat software/EV/autonomy leaves as adoption overlays — not a substitute for road/ocean/air volume.

6.3 Air Cargo Capacity

Air cargo captures time-definite and high-value lanes — pharma, electronics, and expedited replenishment — with yield highly sensitive to belly vs freighter mix. Modeled 2026 reference is USD 606.8 billion (14.0% of global logistics spend).

Air Cargo Capacity — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Air Cargo Capacity	367	448	607	742	908	1111	1359	1663	10.6%

Source: ZAFITYS market databank 2027-2036

Air Cargo Capacity — 10-year trajectory (USD billion)

Source: ZAFITYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Air Cargo Capacity is modeled at 14.0% of global spend (USD 606.8 BN in 2026).
- Trajectory CAGR 10.6% implies ~USD 1,662.6 BN by 2036 as an overlay on physical capacity.
- Treat software/EV/autonomy leaves as adoption overlays — not a substitute for road/ocean/air volume.

6.4 Rail & Intermodal

Rail/intermodal converts long-haul truck miles where corridor reliability and terminal density support door-to-door service products. Modeled 2026 reference is USD 433.4 billion (10.0% of global logistics spend).

Rail & Intermodal — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Rail & Intermodal	265	323	433	527	642	781	950	1155	10.3%

Source: ZAFTYS market databank 2027-2036

Rail & Intermodal — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Rail & Intermodal is modeled at 10.0% of global spend (USD 433.4 BN in 2026).
- Trajectory CAGR 10.3% implies ~USD 1,155.5 BN by 2036 as an overlay on physical capacity.
- Treat software/EV/autonomy leaves as adoption overlays — not a substitute for road/ocean/air volume.

6.5 EV Vans & Green Fleet

EV vans and green-fleet overlays are still a minority of fleet spend but carry above-spine growth tilts as city access rules and shipper Scope-3 targets tighten. Modeled 2026 reference is USD 260.1 billion (6.0% of global logistics spend).

EV Vans & Green Fleet — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
EV Vans & Green Fleet	139	179	260	334	429	551	708	909	13.3%

Source: ZAFTYS market databank 2027-2036

EV Vans & Green Fleet — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- EV Vans & Green Fleet is modeled at 6.0% of global spend (USD 260.1 BN in 2026).
- Trajectory CAGR 13.3% implies ~USD 909.1 BN by 2036 as an overlay on physical capacity.
- Treat software/EV/autonomy leaves as adoption overlays — not a substitute for road/ocean/air volume.

6.6 Autonomous Freight Pilots

Autonomous freight remains pilot-scale economically; modeled spend covers yard/linehaul trials and adjacent stack spend rather than fully scaled TAM. Modeled 2026 reference is USD 130.0 billion (3.0% of global logistics spend).

Autonomous Freight Pilots — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Autonomous Freight Pilots	68	88	130	169	219	284	369	479	13.9%

Source: ZAFITYS market databank 2027-2036

Autonomous Freight Pilots — 10-year trajectory (USD billion)

Source: ZAFITYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Autonomous Freight Pilots is modeled at 3.0% of global spend (USD 130.0 BN in 2026).
- Trajectory CAGR 13.9% implies ~USD 479.4 BN by 2036 as an overlay on physical capacity.
- Treat software/EV/autonomy leaves as adoption overlays — not a substitute for road/ocean/air volume.

6.7 WMS / TMS Software Stack

WMS/TMS stacks monetize warehouse execution and transportation planning; counted here only where tied to logistics operations spend, not pure software TAM. Modeled 2026 reference is USD 216.7 billion (5.0% of global logistics spend).

WMS / TMS Software Stack — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
WMS / TMS Software Stack	120	152	217	274	347	440	557	705	12.5%

Source: ZAFTYS market databank 2027-2036

WMS / TMS Software Stack — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- WMS / TMS Software Stack is modeled at 5.0% of global spend (USD 216.7 BN in 2026).
- Trajectory CAGR 12.5% implies ~USD 705.2 BN by 2036 as an overlay on physical capacity.
- Treat software/EV/autonomy leaves as adoption overlays — not a substitute for road/ocean/air volume.

7 Global Market by End User / Contract Model

Contract model year grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Shippers / Asset Owners	1038	1249	1647	1981	2382	2865	3445	4143	9.7%
3PL / Contract Logistics Operators	797	970	1300	1581	1923	2338	2842	3456	10.3%
4PL / Lead Logistics Providers (LLP)	359	443	607	749	924	1140	1406	1734	11.1%
Carriers & Asset Light Brokers	485	587	780	944	1141	1380	1668	2017	10.0%

Source: ZAFTYS market databank 2027-2036

7.1 Shippers / Asset Owners

Shippers retain control where proprietary fleets, captive warehouses, or regulatory custody requirements dominate — especially industrial and retail private fleets. Modeled share is 38.0% of 2026 global value (USD 1,647.0 billion).

Shippers / Asset Owners — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Shippers / Asset Owners	1027	1241	1647	1989	2402	2902	3504	4233	9.9%

Source: ZAFTYS market databank 2027-2036

Shippers / Asset Owners — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Shippers / Asset Owners holds 38.0% of the contract-model cut (USD 1,647.0 BN in 2026).
- Path CAGR 9.9% points to ~USD 4,232.5 BN by 2036 under constant-role assumptions.
- Watch outsourcing waves and control-tower attach when sizing 3PL vs 4PL vs shipper-owned fleets.

7.2 3PL / Contract Logistics Operators

3PLs convert outsourcing waves in warehousing, distribution, and value-added services; productivity SLAs and automation attach differentiate winners. Modeled share is 30.0% of 2026 global value (USD 1,300.3 billion).

3PL / Contract Logistics Operators — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
3PL / Contract Logistics Operators	789	964	1300	1588	1939	2368	2891	3530	10.5%

Source: ZAFTYS market databank 2027-2036

3PL / Contract Logistics Operators — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- 3PL / Contract Logistics Operators holds 30.0% of the contract-model cut (USD 1,300.3 BN in 2026).
- Path CAGR 10.5% points to ~USD 3,530.4 BN by 2036 under constant-role assumptions.
- Watch outsourcing waves and control-tower attach when sizing 3PL vs 4PL vs shipper-owned fleets.

7.3 4PL / Lead Logistics Providers (LLP)

4PL/LLP is the smallest cut but orchestration-led — integrating multi-carrier and multi-node networks under control-tower commercial models. Modeled share is 14.0% of 2026 global value (USD 606.8 billion).

4PL / Lead Logistics Providers (LLP) — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
4PL / Lead Logistics Providers (LLP)	355	440	607	752	932	1154	1430	1772	11.3%

Source: ZAFTYS market databank 2027-2036

4PL / Lead Logistics Providers (LLP) — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- 4PL / Lead Logistics Providers (LLP) holds 14.0% of the contract-model cut (USD 606.8 BN in 2026).
- Path CAGR 11.3% points to ~USD 1,772.0 BN by 2036 under constant-role assumptions.
- Watch outsourcing waves and control-tower attach when sizing 3PL vs 4PL vs shipper-owned fleets.

7.4 Carriers & Asset Light Brokers

Carriers and asset-light brokers monetize capacity markets; brokerage gross profit remains cyclical with truckload and ocean spot regimes. Modeled share is 18.0% of 2026 global value (USD 780.2 billion).

Carriers & Asset Light Brokers — size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Carriers & Asset Light Brokers	480	583	780	947	1151	1397	1697	2061	10.2%

Source: ZFTYS market databank 2027-2036

Carriers & Asset Light Brokers — 10-year trajectory (USD billion)

Source: ZFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Carriers & Asset Light Brokers holds 18.0% of the contract-model cut (USD 780.2 BN in 2026).
- Path CAGR 10.2% points to ~USD 2,060.8 BN by 2036 under constant-role assumptions.
- Watch outsourcing waves and control-tower attach when sizing 3PL vs 4PL vs shipper-owned fleets.

8 Regional Deep-Dive: North America

North America holds 23.9% of modeled 2026 global logistics value (USD 1,035.9 billion), spanning United States, Canada, Mexico.

North America — regional size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
North America	634	772	1036	1260	1533	1866	2270	2762	10.3%

Source: ZAFTYS market databank 2027-2036

North America — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- North America is a 23.9% slice of the 2026 spine (USD 1,035.9 BN) with path CAGR 10.3%.
- By 2036 the tilted path reaches about USD 2,761.5 BN — use corridor evidence before overriding the prior.
- Pair this leaf with regional deep-dives: mode mix and labor/carbon frictions bend realized growth vs the grid.

Key Visual Takeaways

- Country deep-dives below allocate the North America pool.
- Residual 'Rest of ...' leaves capture long-tail markets.
- Regional CAGR tilts vs global spine are shown in the size path.

8.1 United States — Market Snapshot

Region: North America · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 808.0 BN

SIZE 2036

USD 2,115.9 BN

GLOBAL SHARE

18.64%

CAGR

10.1%

United States participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 808.0 billion (18.64% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- United States is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

8.1.1 United States — Service Offering Grid

United States — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	104	124	163	195	233	279	334	400	9.4%
Ocean Freight (FCL, LCL)	57	68	88	105	125	149	177	211	9.1%
Air Freight (Express, General Cargo)	33	40	54	66	80	98	119	145	10.3%
Rail Freight & Intermodal	21	25	34	41	50	60	73	88	10.0%
Ambient Warehousing	74	89	118	141	170	204	245	294	9.6%
Temperature-Controlled / Cold Storage	39	49	68	84	105	130	161	200	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	23	29	41	51	64	81	101	127	12.0%
Air & Ocean Freight Management	41	50	67	81	99	120	146	177	10.2%
Customs Clearance & Port Handling	29	35	47	56	68	82	99	120	9.9%
Multimodal Transport Orchestration	19	24	32	39	48	59	72	88	10.6%
Kitting, Packaging & Labeling	22	27	37	45	55	67	81	99	10.4%
Reverse Logistics & Returns Processing	21	25	35	43	53	65	81	99	11.0%
Quality Control & Assembly	15	19	25	31	38	46	56	68	10.5%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 808.0 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

8.1.2 United States — Transport / Tech Mode Grid

United States — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	205	246	323	388	465	557	667	799	9.5%
Ocean Fleet & Chartering	114	136	178	212	253	301	359	428	9.2%
Air Cargo Capacity	69	84	113	138	168	204	248	301	10.3%
Rail & Intermodal	50	61	81	98	118	143	173	209	10.0%
EV Vans & Green Fleet	26	34	48	62	79	101	129	165	13.0%
Autonomous Freight Pilots	13	17	24	31	40	52	67	87	13.6%
WMS / TMS Software Stack	23	29	40	51	64	81	102	128	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the United States pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

8.1.3 United States — Application Grids & Takeaways

United States — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	77	94	126	154	187	228	277	338	10.3%
Last-Mile Parcel Delivery	89	109	148	182	223	273	335	411	10.7%
Automotive & Heavy Machinery	86	103	133	159	188	224	266	316	9.0%
High-Tech & Electronics	68	82	109	132	159	193	233	281	9.9%
Cold Chain Biologics & Vaccines	39	48	66	81	100	124	153	188	11.1%
Medical Devices & Supplies	29	35	48	58	70	85	104	126	10.2%
Perishable Cold Chain (Fresh & Frozen)	38	47	63	78	95	116	142	174	10.6%
Dry Food & FMCG Distribution	32	38	50	60	71	85	102	122	9.4%
Hazmat Transport & Storage	24	29	39	47	56	67	81	97	9.6%
Project & Oversized Cargo	17	20	26	31	37	44	52	62	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- United States strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

8.1.4 United States — Corridor, Policy & Investment Notes

United States diligence starts at the gateway layer: Los Angeles/Long Beach, NY/NJ, Savannah, Chicago intermodal, Memphis/Louisville air hubs. Modeled 2026 spend of USD 808.0 billion (18.64% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: FMC ocean oversight, EPA/CARB fleet rules, Jones Act adjacency, state warehouse labor regimes. These frictions can bend realized CAGR versus the United States growth tilt without changing the global spine. Demand hotspots center on E-commerce last-mile density, healthcare logistics, nearshore Mexico industrial inbound. [5]

Competitive presence to monitor: UPS, FedEx, XPO, J.B. Hunt, Schneider, C.H. Robinson, GXO. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- United States: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: FMC ocean oversight.
- Use offering/mode/application grids as allocation maps, not audited books.

8.2 Canada — Market Snapshot

Region: North America · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 145.0 BN

SIZE 2036

USD 379.8 BN

GLOBAL SHARE

3.35%

CAGR

10.1%

Canada participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 145.0 billion (3.35% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- Canada is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

8.2.1 Canada — Service Offering Grid

Canada — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	19	22	29	35	42	50	60	72	9.4%
Ocean Freight (FCL, LCL)	10	12	16	19	22	27	32	38	9.1%
Air Freight (Express, General Cargo)	6	7	10	12	14	18	21	26	10.3%
Rail Freight & Intermodal	4	5	6	7	9	11	13	16	10.0%
Ambient Warehousing	13	16	21	25	30	37	44	53	9.6%

Quality Control & Assembly	3	3	5	6	7	8	10	12	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 145.0 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

8.2.2 Canada — Transport / Tech Mode Grid

Canada — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	37	44	58	70	83	100	120	143	9.5%
Ocean Fleet & Chartering	20	24	32	38	45	54	64	77	9.2%
Air Cargo Capacity	12	15	20	25	30	37	44	54	10.3%
Rail & Intermodal	9	11	15	18	21	26	31	38	10.0%
EV Vans & Green Fleet	5	6	9	11	14	18	23	30	13.0%
Autonomous Freight Pilots	2	3	4	6	7	9	12	16	13.6%
WMS / TMS Software Stack	4	5	7	9	12	14	18	23	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Canada pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

8.2.3 Canada — Application Grids & Takeaways

Canada — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	14	17	23	28	34	41	50	61	10.3%
Last-Mile Parcel Delivery	16	20	27	33	40	49	60	74	10.7%
Automotive & Heavy Machinery	16	18	24	28	34	40	48	57	9.0%
High-Tech & Electronics	12	15	20	24	29	35	42	50	9.9%
Cold Chain Biologics & Vaccines	7	9	12	15	18	22	27	34	11.1%
Medical Devices & Supplies	5	6	9	10	13	15	19	23	10.2%
Perishable Cold Chain (Fresh & Frozen)	7	8	11	14	17	21	26	31	10.6%
Dry Food & FMCG Distribution	6	7	9	11	13	15	18	22	9.4%
Hazmat Transport & Storage	4	5	7	8	10	12	15	17	9.6%
Project & Oversized Cargo	3	4	5	6	7	8	9	11	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Canada strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

8.2.4 Canada — Corridor, Policy & Investment Notes

Canada diligence starts at the gateway layer: Vancouver, Montreal, Toronto Pearson, prairie intermodal nodes. Modeled 2026 spend of USD 145.0 billion (3.35% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: CBSA digitization, provincial trucking rules, carbon pricing overlays. These frictions can bend realized CAGR versus the Canada growth tilt without changing the global spine. Demand hotspots center on Resource outbound, USMCA cross-border, urban parcel densification in GTA/Metro Vancouver. [5]

Competitive presence to monitor: Domestic rails + US parcel/LTL spillover; regional 3PLs. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Canada: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: CBSA digitization.
- Use offering/mode/application grids as allocation maps, not audited books.

8.3 Mexico — Market Snapshot

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Mexico pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

8.3.3 Mexico — Application Grids & Takeaways

Mexico — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	8	10	13	16	19	23	28	35	10.3%
Last-Mile Parcel Delivery	9	11	15	19	23	28	34	42	10.7%
Automotive & Heavy Machinery	9	11	14	16	19	23	27	32	9.0%
High-Tech & Electronics	7	8	11	14	16	20	24	29	9.9%
Cold Chain Biologics & Vaccines	4	5	7	8	10	13	16	19	11.1%
Medical Devices & Supplies	3	4	5	6	7	9	11	13	10.2%
Perishable Cold Chain (Fresh & Frozen)	4	5	7	8	10	12	15	18	10.6%
Dry Food & FMCG Distribution	3	4	5	6	7	9	10	13	9.4%
Hazmat Transport & Storage	3	3	4	5	6	7	8	10	9.6%
Project & Oversized Cargo	2	2	3	3	4	5	5	6	9.3%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Mexico strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

8.3.4 Mexico — Corridor, Policy & Investment Notes

Mexico diligence starts at the gateway layer: Manzanillo, Lázaro Cárdenas, Veracruz, Monterrey/Salttillo industrial corridors, AICM/AIFA air. Modeled 2026 spend of USD 82.9 billion (1.91% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: USMCA rules of origin, customs broker reforms, security on northbound truck lanes. These frictions can bend realized CAGR versus the Mexico growth tilt without changing the global spine. Demand hotspots center on Nearshoring auto/electronics, cross-border TL, bonded maquiladora logistics. [5]

Competitive presence to monitor: Cross-border specialists, Schneider-class NA carriers, local 3PLs. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Mexico: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: USMCA rules of origin.
- Use offering/mode/application grids as allocation maps, not audited books.

9 Regional Deep-Dive: Europe

Europe holds 20.4% of modeled 2026 global logistics value (USD 884.2 billion), spanning Germany, United Kingdom, France, Italy, Spain, Rest of Europe.

Europe — regional size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Europe	554	668	884	1066	1285	1549	1868	2251	9.8%

Source: ZAFTYS market databank 2027-2036

Europe — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Europe is a 20.4% slice of the 2026 spine (USD 884.2 BN) with path CAGR 9.8%.
- By 2036 the tilted path reaches about USD 2,251.4 BN — use corridor evidence before overriding the prior.
- Pair this leaf with regional deep-dives: mode mix and labor/carbon frictions bend realized growth vs the grid.

Key Visual Takeaways

- Country deep-dives below allocate the Europe pool.
- Residual 'Rest of ...' leaves capture long-tail markets.
- Regional CAGR tilts vs global spine are shown in the size path.

9.1 Germany — Market Snapshot

Region: Europe · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 194.5 BN

SIZE 2036

USD 509.4 BN

GLOBAL SHARE

4.49%

CAGR

10.1%

Germany participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 194.5 billion (4.49% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- Germany is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

9.1.1 Germany — Service Offering Grid

Germany — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	25	30	39	47	56	67	80	96	9.4%
Ocean Freight (FCL, LCL)	14	16	21	25	30	36	43	51	9.1%
Air Freight (Express, General Cargo)	8	10	13	16	19	24	29	35	10.3%
Rail Freight & Intermodal	5	6	8	10	12	14	18	21	10.0%

Project & Oversized Cargo	4	5	6	7	9	11	13	15	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Germany strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

9.1.4 Germany — Corridor, Policy & Investment Notes

Germany diligence starts at the gateway layer: Hamburg, Bremerhaven, Frankfurt air, Duisburg inland, Bavaria auto clusters. Modeled 2026 spend of USD 194.5 billion (4.49% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: EU ETS / FuelEU, Maut tolls, strict warehouse labor and cold-chain GMP adjacency. These frictions can bend realized CAGR versus the Germany growth tilt without changing the global spine. Demand hotspots center on Automotive inbound, chemical hazmat, contract logistics for retail/industrials. [4]

Competitive presence to monitor: DHL, DB Schenker, K+N, DSV, Geodis. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Germany: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: EU ETS / FuelEU.
- Use offering/mode/application grids as allocation maps, not audited books.

9.2 United Kingdom — Market Snapshot

Region: Europe · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 159.2 BN

SIZE 2036

USD 416.8 BN

GLOBAL SHARE

3.67%

CAGR

10.1%

United Kingdom participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 159.2 billion (3.67% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- United Kingdom is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

9.2.1 United Kingdom — Service Offering Grid

United Kingdom — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	20	24	32	38	46	55	66	79	9.4%
Ocean Freight (FCL, LCL)	11	13	17	21	25	29	35	42	9.1%
Air Freight (Express, General Cargo)	7	8	11	13	16	19	23	29	10.3%
Rail Freight & Intermodal	4	5	7	8	10	12	14	17	10.0%
Ambient Warehousing	15	18	23	28	33	40	48	58	9.6%
Temperature-Controlled / Cold Storage	8	10	13	17	21	26	32	39	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	5	6	8	10	13	16	20	25	12.0%
Air & Ocean Freight Management	8	10	13	16	19	24	29	35	10.2%
Customs Clearance & Port Handling	6	7	9	11	13	16	20	24	9.9%
Multimodal Transport Orchestration	4	5	6	8	9	12	14	17	10.6%
Kitting, Packaging & Labeling	4	5	7	9	11	13	16	20	10.4%
Reverse Logistics & Returns Processing	4	5	7	8	10	13	16	20	11.0%
Quality Control & Assembly	3	4	5	6	7	9	11	13	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 159.2 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

9.2.2 United Kingdom — Transport / Tech Mode Grid

United Kingdom — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	40	48	64	76	92	110	131	157	9.5%
Ocean Fleet & Chartering	22	27	35	42	50	59	71	84	9.2%
Air Cargo Capacity	14	17	22	27	33	40	49	59	10.3%
Rail & Intermodal	10	12	16	19	23	28	34	41	10.0%
EV Vans & Green Fleet	5	7	10	12	16	20	25	32	13.0%
Autonomous Freight Pilots	3	3	5	6	8	10	13	17	13.6%
WMS / TMS Software Stack	4	6	8	10	13	16	20	25	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the United Kingdom pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

9.2.3 United Kingdom — Application Grids & Takeaways

United Kingdom — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	15	19	25	30	37	45	55	66	10.3%
Last-Mile Parcel Delivery	18	22	29	36	44	54	66	81	10.7%
Automotive & Heavy Machinery	17	20	26	31	37	44	52	62	9.0%
High-Tech & Electronics	13	16	21	26	31	38	46	55	9.9%
Cold Chain Biologics & Vaccines	8	9	13	16	20	24	30	37	11.1%
Medical Devices & Supplies	6	7	9	11	14	17	20	25	10.2%
Perishable Cold Chain (Fresh & Frozen)	8	9	12	15	19	23	28	34	10.6%
Dry Food & FMCG Distribution	6	7	10	12	14	17	20	24	9.4%
Hazmat Transport & Storage	5	6	8	9	11	13	16	19	9.6%
Project & Oversized Cargo	3	4	5	6	7	9	10	12	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- United Kingdom strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

9.2.4 United Kingdom — Corridor, Policy & Investment Notes

United Kingdom diligence starts at the gateway layer: Felixstowe, Southampton, London Gateway, Heathrow/East Midlands air. Modeled 2026 spend of USD 159.2 billion (3.67% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Post-Brexit customs friction, border target operating model, net-zero fleet pressures. These frictions can bend realized CAGR versus the United Kingdom growth tilt without changing the global spine. Demand hotspots center on Import-heavy retail, pharma, parcel density around London Midlands. [4]

Competitive presence to monitor: DHL, UPS, FedEx, Wincanton-class contract logistics, global forwarders. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- United Kingdom: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Post-Brexit customs friction.
- Use offering/mode/application grids as allocation maps, not audited books.

9.3 France — Market Snapshot

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- France strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

9.3.4 France — Corridor, Policy & Investment Notes

France diligence starts at the gateway layer: Le Havre, Marseille-Fos, Charles de Gaulle, Lille/Paris warehouse belts. Modeled 2026 spend of USD 141.5 billion (3.26% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: EU ETS, social labor codes, rail freight modal-shift incentives. These frictions can bend realized CAGR versus the France growth tilt without changing the global spine. Demand hotspots center on Luxury/retail distribution, aerospace, food cold chain, automotive. [4]

Competitive presence to monitor: Geodis, DHL, K+N, SNCF multimodal adjacency. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- France: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: EU ETS.
- Use offering/mode/application grids as allocation maps, not audited books.

- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

9.5.4 Spain — Corridor, Policy & Investment Notes

Spain diligence starts at the gateway layer: Valencia, Algeciras, Barcelona, Madrid Barajas, Zaragoza plaza. Modeled 2026 spend of USD 88.4 billion (2.04% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: EU ETS, port digital single window, Iberian energy/fuel cost pass-through. These frictions can bend realized CAGR versus the Spain growth tilt without changing the global spine. Demand hotspots center on Auto and agri-food exports, e-commerce for Iberia, LatAm gateway adjacency. [4]

Competitive presence to monitor: DHL, K+N, local contract logistics specialists. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Spain: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: EU ETS.
- Use offering/mode/application grids as allocation maps, not audited books.

9.6 Rest of Europe — Market Snapshot

Region: Europe · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 194.5 BN

SIZE 2036

USD 509.4 BN

GLOBAL SHARE

4.49%

CAGR

10.1%

Rest of Europe participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 194.5 billion (4.49% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- Rest of Europe is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

9.6.1 Rest of Europe — Service Offering Grid

Rest of Europe — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	25	30	39	47	56	67	80	96	9.4%
Ocean Freight (FCL, LCL)	14	16	21	25	30	36	43	51	9.1%
Air Freight (Express, General Cargo)	8	10	13	16	19	24	29	35	10.3%
Rail Freight & Intermodal	5	6	8	10	12	14	18	21	10.0%
Ambient Warehousing	18	21	28	34	41	49	59	71	9.6%
Temperature-Controlled / Cold Storage	10	12	16	20	25	31	39	48	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	6	7	10	12	15	19	24	31	12.0%
Air & Ocean Freight Management	10	12	16	20	24	29	35	43	10.2%
Customs Clearance & Port Handling	7	8	11	14	16	20	24	29	9.9%
Multimodal Transport Orchestration	5	6	8	9	12	14	17	21	10.6%
Kitting, Packaging & Labeling	5	7	9	11	13	16	20	24	10.4%
Reverse Logistics & Returns Processing	5	6	8	10	13	16	19	24	11.0%
Quality Control & Assembly	4	4	6	7	9	11	14	16	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 194.5 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

9.6.2 Rest of Europe — Transport / Tech Mode Grid

Rest of Europe — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	49	59	78	93	112	134	161	192	9.5%
Ocean Fleet & Chartering	27	33	43	51	61	73	86	103	9.2%
Air Cargo Capacity	17	20	27	33	40	49	60	72	10.3%
Rail & Intermodal	12	15	19	24	29	34	42	50	10.0%
EV Vans & Green Fleet	6	8	12	15	19	24	31	40	13.0%
Autonomous Freight Pilots	3	4	6	8	10	13	16	21	13.6%
WMS / TMS Software Stack	5	7	10	12	15	19	24	31	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Rest of Europe pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

9.6.3 Rest of Europe — Application Grids & Takeaways

Rest of Europe — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	19	23	30	37	45	55	67	81	10.3%
Last-Mile Parcel Delivery	21	26	36	44	54	66	81	99	10.7%
Automotive & Heavy Machinery	21	25	32	38	45	54	64	76	9.0%
High-Tech & Electronics	16	20	26	32	38	46	56	68	9.9%
Cold Chain Biologics & Vaccines	9	12	16	20	24	30	37	45	11.1%
Medical Devices & Supplies	7	9	11	14	17	21	25	30	10.2%
Perishable Cold Chain (Fresh & Frozen)	9	11	15	19	23	28	34	42	10.6%
Dry Food & FMCG Distribution	8	9	12	14	17	21	25	29	9.4%
Hazmat Transport & Storage	6	7	9	11	13	16	19	23	9.6%
Project & Oversized Cargo	4	5	6	7	9	11	13	15	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Rest of Europe strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

9.6.4 Rest of Europe — Corridor, Policy & Investment Notes

Rest of Europe diligence starts at the gateway layer: Rotterdam, Antwerp, Gdansk, Prague/Vienna inland hubs, Nordics ports. Modeled 2026 spend of USD 194.5 billion (4.49% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: EU customs code, ETS maritime, CEE labor arbitrage vs West Europe costs. These frictions can bend realized CAGR versus the Rest of Europe growth tilt without changing the global spine. Demand hotspots center on CEE manufacturing nearshore, Benelux gateway re-exports, Nordics retail. [4]

Competitive presence to monitor: DSV, DB Schenker, K+N, regional champions. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Rest of Europe: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: EU customs code.
- Use offering/mode/application grids as allocation maps, not audited books.

10 Regional Deep-Dive: Asia-Pacific

Asia-Pacific holds 35.3% of modeled 2026 global logistics value (USD 1,530.0 billion), spanning China, India, Japan, South Korea, Australia, Rest of APAC.

Asia-Pacific — regional size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Asia-Pacific	920	1128	1530	1875	2298	2817	3452	4231	10.7%

Source: ZAFTYS market databank 2027-2036

Asia-Pacific — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Asia-Pacific is a 35.3% slice of the 2026 spine (USD 1,530.0 BN) with path CAGR 10.7%.
- By 2036 the tilted path reaches about USD 4,230.6 BN — use corridor evidence before overriding the prior.
- Pair this leaf with regional deep-dives: mode mix and labor/carbon frictions bend realized growth vs the grid.

Key Visual Takeaways

- Country deep-dives below allocate the Asia-Pacific pool.
- Residual 'Rest of ...' leaves capture long-tail markets.
- Regional CAGR tilts vs global spine are shown in the size path.

10.1 China — Market Snapshot

Region: Asia-Pacific · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 642.6 BN

SIZE 2036

USD 1,682.8 BN

GLOBAL SHARE

14.83%

CAGR

10.1%

China participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 642.6 billion (14.83% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- China is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

10.1.1 China — Service Offering Grid

China — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	83	99	130	155	186	222	266	318	9.4%
Ocean Freight (FCL, LCL)	45	54	70	84	99	118	141	168	9.1%
Air Freight (Express, General Cargo)	26	32	43	53	64	78	95	115	10.3%
Rail Freight & Intermodal	17	20	27	33	40	48	58	70	10.0%
Ambient Warehousing	59	71	94	112	135	162	195	234	9.6%
Temperature-Controlled / Cold Storage	31	39	54	67	83	103	128	159	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	18	23	32	41	51	64	80	101	12.0%
Air & Ocean Freight Management	33	40	53	65	79	95	116	141	10.2%
Customs Clearance & Port Handling	23	28	37	45	54	65	79	95	9.9%
Multimodal Transport Orchestration	15	19	25	31	38	47	57	70	10.6%
Kitting, Packaging & Labeling	18	22	29	36	44	53	65	79	10.4%
Reverse Logistics & Returns Processing	16	20	28	34	42	52	64	79	11.0%
Quality Control & Assembly	12	15	20	24	30	37	45	54	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 642.6 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

10.1.2 China — Transport / Tech Mode Grid

China — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	163	195	257	308	370	443	531	636	9.5%
Ocean Fleet & Chartering	91	108	141	169	201	240	286	340	9.2%
Air Cargo Capacity	55	67	90	110	133	162	197	239	10.3%
Rail & Intermodal	40	48	64	78	94	114	138	166	10.0%
EV Vans & Green Fleet	21	27	39	49	63	80	103	131	13.0%
Autonomous Freight Pilots	10	13	19	25	32	42	54	69	13.6%
WMS / TMS Software Stack	18	23	32	40	51	64	81	102	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the China pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

10.1.3 China — Application Grids & Takeaways

China — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	61	75	101	122	149	181	221	268	10.3%
Last-Mile Parcel Delivery	71	87	118	145	177	217	267	327	10.7%
Automotive & Heavy Machinery	69	82	106	126	150	178	212	251	9.0%
High-Tech & Electronics	54	65	87	105	127	153	185	223	9.9%
Cold Chain Biologics & Vaccines	31	38	52	64	80	98	121	150	11.1%
Medical Devices & Supplies	23	28	38	46	56	68	82	100	10.2%
Perishable Cold Chain (Fresh & Frozen)	30	37	50	62	75	92	113	138	10.6%
Dry Food & FMCG Distribution	25	30	40	47	57	68	81	97	9.4%
Hazmat Transport & Storage	19	23	31	37	45	54	64	77	9.6%
Project & Oversized Cargo	13	16	21	25	29	35	42	50	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- China strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

10.1.4 China — Corridor, Policy & Investment Notes

China diligence starts at the gateway layer: Shanghai, Ningbo, Shenzhen, Guangzhou, Beijing/Shanghai air, Yangtze river hubs. Modeled 2026 spend of USD 642.6 billion (14.83% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Customs facilitation zones, dual-circulation logistics policy, data/cross-border e-commerce rules. These frictions can bend realized CAGR versus the China growth tilt without changing the global spine. Demand hotspots center on Export manufacturing, domestic e-commerce fulfillment, cold chain for food/pharma. [3]

Competitive presence to monitor: Sinotrans, SF-class CEP, global forwarders, Maersk logistics. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- China: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Customs facilitation zones.
- Use offering/mode/application grids as allocation maps, not audited books.

10.2 India — Market Snapshot

Quality Control & Assembly	5	6	9	11	13	16	19	23	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 275.4 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

10.2.2 India — Transport / Tech Mode Grid

India — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	70	84	110	132	158	190	227	272	9.5%
Ocean Fleet & Chartering	39	46	61	72	86	103	122	146	9.2%
Air Cargo Capacity	24	29	39	47	57	69	84	103	10.3%
Rail & Intermodal	17	21	28	33	40	49	59	71	10.0%
EV Vans & Green Fleet	9	11	17	21	27	34	44	56	13.0%
Autonomous Freight Pilots	4	6	8	11	14	18	23	30	13.6%
WMS / TMS Software Stack	8	10	14	17	22	28	35	44	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the India pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

10.2.3 India — Application Grids & Takeaways

India — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	26	32	43	52	64	78	95	115	10.3%
Last-Mile Parcel Delivery	30	37	51	62	76	93	114	140	10.7%
Automotive & Heavy Machinery	29	35	45	54	64	76	91	108	9.0%
High-Tech & Electronics	23	28	37	45	54	66	79	96	9.9%
Cold Chain Biologics & Vaccines	13	16	22	28	34	42	52	64	11.1%
Medical Devices & Supplies	10	12	16	20	24	29	35	43	10.2%
Perishable Cold Chain (Fresh & Frozen)	13	16	22	26	32	40	48	59	10.6%
Dry Food & FMCG Distribution	11	13	17	20	24	29	35	42	9.4%
Hazmat Transport & Storage	8	10	13	16	19	23	28	33	9.6%
Project & Oversized Cargo	6	7	9	11	13	15	18	21	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- India strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

10.2.4 India — Corridor, Policy & Investment Notes

India diligence starts at the gateway layer: JNPT/Mumbai, Mundra, Chennai, Delhi NCR air, dedicated freight corridors. Modeled 2026 spend of USD 275.4 billion (6.35% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: GST-era warehouse consolidation, National Logistics Policy, customs faceless assessment. These frictions can bend realized CAGR versus the India growth tilt without changing the global spine. Demand hotspots center on Domestic distribution, pharma cold chain, electronics manufacturing corridors. [3]

Competitive presence to monitor: Domestic 3PLs, global forwarders, express specialists. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- India: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: GST-era warehouse consolidation.
- Use offering/mode/application grids as allocation maps, not audited books.

10.3 Japan — Market Snapshot

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Japan pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

10.3.3 Japan — Application Grids & Takeaways

Japan — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	20	25	34	41	50	60	74	89	10.3%
Last-Mile Parcel Delivery	24	29	39	48	59	73	89	109	10.7%
Automotive & Heavy Machinery	23	27	35	42	50	59	71	84	9.0%
High-Tech & Electronics	18	22	29	35	42	51	62	74	9.9%
Cold Chain Biologics & Vaccines	10	13	17	21	27	33	40	50	11.1%
Medical Devices & Supplies	8	9	13	15	19	23	27	33	10.2%
Perishable Cold Chain (Fresh & Frozen)	10	12	17	21	25	31	38	46	10.6%
Dry Food & FMCG Distribution	8	10	13	16	19	23	27	32	9.4%
Hazmat Transport & Storage	6	8	10	12	15	18	21	26	9.6%
Project & Oversized Cargo	4	5	7	8	10	12	14	17	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Japan strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

10.3.4 Japan — Corridor, Policy & Investment Notes

Japan diligence starts at the gateway layer: Tokyo/Yokohama, Osaka/Kobe, Narita/Haneda, Nagoya auto ports. Modeled 2026 spend of USD 214.2 billion (4.94% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Strict quality/cold-chain standards, labor hour reforms, disaster-resilient logistics planning. These frictions can bend realized CAGR versus the Japan growth tilt without changing the global spine. Demand hotspots center on High-tech, automotive parts, domestic convenience-retail density, project heavy haul. [3]

Competitive presence to monitor: Nippon Express, Yamato-class parcel, global forwarders. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Japan: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Strict quality/cold-chain standards.
- Use offering/mode/application grids as allocation maps, not audited books.

10.4 South Korea — Market Snapshot

Region: Asia-Pacific · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 122.4 BN

SIZE 2036

USD 320.5 BN

GLOBAL SHARE

2.82%

CAGR

10.1%

South Korea participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 122.4 billion (2.82% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- South Korea is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

10.4.1 South Korea — Service Offering Grid

South Korea — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	16	19	25	30	35	42	51	61	9.4%
Ocean Freight (FCL, LCL)	9	10	13	16	19	23	27	32	9.1%
Air Freight (Express, General Cargo)	5	6	8	10	12	15	18	22	10.3%
Rail Freight & Intermodal	3	4	5	6	8	9	11	13	10.0%
Ambient Warehousing	11	14	18	21	26	31	37	45	9.6%
Temperature-Controlled / Cold Storage	6	7	10	13	16	20	24	30	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	3	4	6	8	10	12	15	19	12.0%
Air & Ocean Freight Management	6	8	10	12	15	18	22	27	10.2%
Customs Clearance & Port Handling	4	5	7	9	10	12	15	18	9.9%
Multimodal Transport Orchestration	3	4	5	6	7	9	11	13	10.6%
Kitting, Packaging & Labeling	3	4	6	7	8	10	12	15	10.4%

Perishable Cold Chain (Fresh & Frozen)	6	7	10	12	14	18	22	26	10.6%
Dry Food & FMCG Distribution	5	6	8	9	11	13	16	19	9.4%
Hazmat Transport & Storage	4	4	6	7	8	10	12	15	9.6%
Project & Oversized Cargo	3	3	4	5	6	7	8	9	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- South Korea strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

10.4.4 South Korea — Corridor, Policy & Investment Notes

South Korea diligence starts at the gateway layer: Busan, Incheon air/port, Seoul metro fulfillment belts. Modeled 2026 spend of USD 122.4 billion (2.82% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Export customs efficiency, free economic zones, battery/chem hazmat rules. These frictions can bend realized CAGR versus the South Korea growth tilt without changing the global spine. Demand hotspots center on Electronics, auto, battery materials, high-frequency e-commerce. [3]

Competitive presence to monitor: Korean conglomerates' logistics arms + global forwarders. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- South Korea: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Export customs efficiency.
- Use offering/mode/application grids as allocation maps, not audited books.

Project & Oversized Cargo	2	2	3	4	4	5	6	7	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Australia strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

10.5.4 Australia — Corridor, Policy & Investment Notes

Australia diligence starts at the gateway layer: Sydney, Melbourne, Brisbane, Fremantle, major domestic air network. Modeled 2026 spend of USD 91.8 billion (2.12% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Biosecurity inspection intensity, coastal shipping limits, state road access rules. These frictions can bend realized CAGR versus the Australia growth tilt without changing the global spine. Demand hotspots center on Import retail, mining project cargo, cold chain for agri-exports. [3]

Competitive presence to monitor: Domestic contract logistics + global express/forwarders. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Australia: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Biosecurity inspection intensity.
- Use offering/mode/application grids as allocation maps, not audited books.

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Rest of APAC strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

10.6.4 Rest of APAC — Corridor, Policy & Investment Notes

Rest of APAC diligence starts at the gateway layer: Singapore, Port Klang, Ho Chi Minh, Jakarta, Bangkok, Manila. Modeled 2026 spend of USD 183.6 billion (4.24% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: ASEAN customs facilitation, free-trade zone competition, cabotage variance by market. These frictions can bend realized CAGR versus the Rest of APAC growth tilt without changing the global spine. Demand hotspots center on Electronics manufacturing shifts, intra-ASEAN distribution, hub-and-spoke re-exports. [3]

Competitive presence to monitor: Global forwarders, regional 3PLs, ocean alliance hubs. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Rest of APAC: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: ASEAN customs facilitation.
- Use offering/mode/application grids as allocation maps, not audited books.

11 Regional Deep-Dive: Middle East & Africa

Middle East & Africa holds 10.2% of modeled 2026 global logistics value (USD 442.1 billion), spanning Saudi Arabia, UAE, South Africa, Rest of MEA.

Middle East & Africa — regional size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Middle East & Africa	263	324	442	544	669	823	1012	1245	10.9%

Source: ZAFYYS market databank 2027-2036

Middle East & Africa — 10-year trajectory (USD billion)

Source: ZAFYYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Middle East & Africa is a 10.2% slice of the 2026 spine (USD 442.1 BN) with path CAGR 10.9%.
- By 2036 the tilted path reaches about USD 1,244.9 BN — use corridor evidence before overriding the prior.
- Pair this leaf with regional deep-dives: mode mix and labor/carbon frictions bend realized growth vs the grid.

Key Visual Takeaways

- Country deep-dives below allocate the Middle East & Africa pool.
- Residual 'Rest of ...' leaves capture long-tail markets.
- Regional CAGR tilts vs global spine are shown in the size path.

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 123.8 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

11.1.2 Saudi Arabia — Transport / Tech Mode Grid

Saudi Arabia — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	31	38	50	59	71	85	102	122	9.5%
Ocean Fleet & Chartering	17	21	27	32	39	46	55	66	9.2%
Air Cargo Capacity	11	13	17	21	26	31	38	46	10.3%
Rail & Intermodal	8	9	12	15	18	22	27	32	10.0%
EV Vans & Green Fleet	4	5	7	9	12	15	20	25	13.0%
Autonomous Freight Pilots	2	3	4	5	6	8	10	13	13.7%
WMS / TMS Software Stack	3	4	6	8	10	12	16	20	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Saudi Arabia pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

11.1.3 Saudi Arabia — Application Grids & Takeaways

Saudi Arabia — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	12	14	19	24	29	35	43	52	10.3%
Last-Mile Parcel Delivery	14	17	23	28	34	42	51	63	10.7%
Automotive & Heavy Machinery	13	16	20	24	29	34	41	48	9.0%
High-Tech & Electronics	10	13	17	20	24	29	36	43	9.9%
Cold Chain Biologics & Vaccines	6	7	10	12	15	19	23	29	11.1%
Medical Devices & Supplies	4	5	7	9	11	13	16	19	10.2%
Perishable Cold Chain (Fresh & Frozen)	6	7	10	12	15	18	22	27	10.6%
Dry Food & FMCG Distribution	5	6	8	9	11	13	16	19	9.4%
Hazmat Transport & Storage	4	5	6	7	9	10	12	15	9.6%
Project & Oversized Cargo	3	3	4	5	6	7	8	10	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Saudi Arabia strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

11.1.4 Saudi Arabia — Corridor, Policy & Investment Notes

Saudi Arabia diligence starts at the gateway layer: Jeddah Islamic Port, King Abdullah Port, Riyadh dry ports, Dammam. Modeled 2026 spend of USD 123.8 billion (2.86% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Vision 2030 logistics zones, Saudization labor rules, customs modernization. These frictions can bend realized CAGR versus the Saudi Arabia growth tilt without changing the global spine. Demand hotspots center on Mega-project cargo, retail modernization, religious-travel peak logistics. [3]

Competitive presence to monitor: Global forwarders + Gulf contract logistics JVs. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Saudi Arabia: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Vision 2030 logistics zones.
- Use offering/mode/application grids as allocation maps, not audited books.

11.2 UAE — Market Snapshot

Region: Middle East & Africa · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 114.9 BN

SIZE 2036

USD 301.0 BN

GLOBAL SHARE

2.65%

CAGR

10.1%

UAE participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 114.9 billion (2.65% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- UAE is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

11.2.1 UAE — Service Offering Grid

UAE — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	15	18	23	28	33	40	48	57	9.4%
Ocean Freight (FCL, LCL)	8	10	13	15	18	21	25	30	9.1%
Air Freight (Express, General Cargo)	5	6	8	9	11	14	17	21	10.3%
Rail Freight & Intermodal	3	4	5	6	7	9	10	13	10.0%
Ambient Warehousing	11	13	17	20	24	29	35	42	9.6%
Temperature-Controlled / Cold Storage	6	7	10	12	15	18	23	28	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	3	4	6	7	9	11	14	18	12.0%
Air & Ocean Freight Management	6	7	10	12	14	17	21	25	10.2%
Customs Clearance & Port Handling	4	5	7	8	10	12	14	17	9.9%
Multimodal Transport Orchestration	3	3	5	6	7	8	10	12	10.6%
Kitting, Packaging & Labeling	3	4	5	6	8	10	12	14	10.4%
Reverse Logistics & Returns Processing	3	4	5	6	8	9	11	14	11.0%
Quality Control & Assembly	2	3	4	4	5	7	8	10	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 114.9 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

11.2.2 UAE — Transport / Tech Mode Grid

UAE — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	29	35	46	55	66	79	95	114	9.5%
Ocean Fleet & Chartering	16	19	25	30	36	43	51	61	9.2%
Air Cargo Capacity	10	12	16	20	24	29	35	43	10.3%
Rail & Intermodal	7	9	11	14	17	20	25	30	10.0%
EV Vans & Green Fleet	4	5	7	9	11	14	18	23	13.0%

WMS / TMS Software Stack	3	4	6	7	9	11	14	18	12.2%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the UAE pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

11.2.3 UAE — Application Grids & Takeaways

UAE — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	11	13	18	22	27	32	39	48	10.3%
Last-Mile Parcel Delivery	13	16	21	26	32	39	48	58	10.7%
Automotive & Heavy Machinery	12	15	19	23	27	32	38	45	9.0%
High-Tech & Electronics	10	12	16	19	23	27	33	40	9.9%
Cold Chain Biologics & Vaccines	6	7	9	12	14	18	22	27	11.1%
Medical Devices & Supplies	4	5	7	8	10	12	15	18	10.2%
Perishable Cold Chain (Fresh & Frozen)	5	7	9	11	14	17	20	25	10.6%
Dry Food & FMCG Distribution	5	5	7	8	10	12	15	17	9.4%
Hazmat Transport & Storage	3	4	6	7	8	10	12	14	9.6%
Project & Oversized Cargo	2	3	4	4	5	6	7	9	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- UAE strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

11.2.4 UAE — Corridor, Policy & Investment Notes

UAE diligence starts at the gateway layer: Jebel Ali, DP World terminals, Dubai/Abu Dhabi air hubs, KIZAD. Modeled 2026 spend of USD 114.9 billion (2.65% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Free-zone customs regimes, re-export facilitation, sustainability mandates at ports. These frictions can bend realized CAGR versus the UAE growth tilt without changing the global spine. Demand hotspots center on Re-export hub economics, luxury retail, pharma re-export, regional distribution. [3]

Competitive presence to monitor: Global integrators, regional 3PLs, ocean terminal-linked logistics. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- UAE: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Free-zone customs regimes.
- Use offering/mode/application grids as allocation maps, not audited books.

11.3 South Africa — Market Snapshot

Hazmat Transport & Storage	2	3	4	5	6	7	8	10	9.6%
Project & Oversized Cargo	2	2	3	3	4	4	5	6	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- South Africa strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

11.3.4 South Africa — Corridor, Policy & Investment Notes

South Africa diligence starts at the gateway layer: Durban, Cape Town, Johannesburg OR Tambo, inland rail corridors. Modeled 2026 spend of USD 79.6 billion (1.84% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Port performance reforms, rail concession debates, cross-border SADC frictions. These frictions can bend realized CAGR versus the South Africa growth tilt without changing the global spine. Demand hotspots center on Mining outbound, retail imports, regional distribution into Southern Africa. [3]

Competitive presence to monitor: Local 3PLs + global forwarders; corridor trucking specialists. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- South Africa: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Port performance reforms.
- Use offering/mode/application grids as allocation maps, not audited books.

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Rest of MEA strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

11.4.4 Rest of MEA — Corridor, Policy & Investment Notes

Rest of MEA diligence starts at the gateway layer: Tangier Med, Port Said, Lagos, Mombasa, selected Gulf secondary ports. Modeled 2026 spend of USD 123.8 billion (2.86% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Uneven customs digitization, FX/import controls in parts of Africa, corridor PPPs. These frictions can bend realized CAGR versus the Rest of MEA growth tilt without changing the global spine. Demand hotspots center on Consumer import densification, energy project cargo, intra-regional trucking. [3]

Competitive presence to monitor: Regional champions + selective global network partners. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Rest of MEA: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Uneven customs digitization.
- Use offering/mode/application grids as allocation maps, not audited books.

12 Regional Deep-Dive: Latin America

Latin America holds 10.2% of modeled 2026 global logistics value (USD 442.1 billion), spanning Brazil, Argentina, Rest of LATAM.

Latin America — regional size path (USD billion)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Latin America	268	328	442	540	659	805	983	1200	10.5%

Source: ZAFTYS market databank 2027-2036

Latin America — 10-year trajectory (USD billion)

Source: ZAFTYS databank spine · CeTZ mini line

Analyst Executive Lessons

- Latin America is a 10.2% slice of the 2026 spine (USD 442.1 BN) with path CAGR 10.5%.
- By 2036 the tilted path reaches about USD 1,200.3 BN — use corridor evidence before overriding the prior.
- Pair this leaf with regional deep-dives: mode mix and labor/carbon frictions bend realized growth vs the grid.

Key Visual Takeaways

- Country deep-dives below allocate the Latin America pool.
- Residual 'Rest of ...' leaves capture long-tail markets.
- Regional CAGR tilts vs global spine are shown in the size path.

Multimodal Transport Orchestration	5	6	8	10	13	15	19	23	10.6%
Kitting, Packaging & Labeling	6	7	10	12	14	18	21	26	10.4%
Reverse Logistics & Returns Processing	5	7	9	11	14	17	21	26	11.0%
Quality Control & Assembly	4	5	7	8	10	12	15	18	10.5%

Source: ZFTYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 212.2 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

12.1.2 Brazil — Transport / Tech Mode Grid

Brazil — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	54	65	85	102	122	146	175	210	9.5%
Ocean Fleet & Chartering	30	36	47	56	66	79	94	112	9.2%
Air Cargo Capacity	18	22	30	36	44	54	65	79	10.3%
Rail & Intermodal	13	16	21	26	31	38	45	55	10.0%
EV Vans & Green Fleet	7	9	13	16	21	27	34	43	13.0%
Autonomous Freight Pilots	3	4	6	8	11	14	18	23	13.6%
WMS / TMS Software Stack	6	8	11	13	17	21	27	34	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Brazil pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

12.1.3 Brazil — Application Grids & Takeaways

Brazil — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	20	25	33	40	49	60	73	89	10.3%
Last-Mile Parcel Delivery	23	29	39	48	59	72	88	108	10.7%
Automotive & Heavy Machinery	23	27	35	42	49	59	70	83	9.0%
High-Tech & Electronics	18	22	29	35	42	51	61	74	9.9%
Cold Chain Biologics & Vaccines	10	13	17	21	26	32	40	49	11.1%
Medical Devices & Supplies	8	9	12	15	18	22	27	33	10.2%
Perishable Cold Chain (Fresh & Frozen)	10	12	17	20	25	31	37	46	10.6%
Dry Food & FMCG Distribution	8	10	13	16	19	22	27	32	9.4%
Hazmat Transport & Storage	6	8	10	12	15	18	21	26	9.6%
Project & Oversized Cargo	4	5	7	8	10	12	14	16	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Brazil strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

12.1.4 Brazil — Corridor, Policy & Investment Notes

Brazil diligence starts at the gateway layer: Santos, Paranaguá, Rio, Guarulhos air, Campinas industrial belt. Modeled 2026 spend of USD 212.2 billion (4.90% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Complex state ICMS logistics, customs backlog risk, cabotage incentives. These frictions can bend realized CAGR versus the Brazil growth tilt without changing the global spine. Demand hotspots center on Agri-export bulk/container mix, industrial inbound, e-commerce in São Paulo/Rio. [3]

Competitive presence to monitor: Local 3PLs, global forwarders, ocean carriers' inland arms. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Brazil: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Complex state ICMS logistics.
- Use offering/mode/application grids as allocation maps, not audited books.

12.2 Argentina — Market Snapshot

Region: Latin America · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 79.6 BN

SIZE 2036

USD 208.4 BN

GLOBAL SHARE

1.84%

CAGR

10.1%

Argentina participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 79.6 billion (1.84% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- Argentina is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

12.2.1 Argentina — Service Offering Grid

Argentina — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	10	12	16	19	23	28	33	39	9.4%
Ocean Freight (FCL, LCL)	6	7	9	10	12	15	17	21	9.1%
Air Freight (Express, General Cargo)	3	4	5	7	8	10	12	14	10.3%
Rail Freight & Intermodal	2	3	3	4	5	6	7	9	10.0%
Ambient Warehousing	7	9	12	14	17	20	24	29	9.6%
Temperature-Controlled / Cold Storage	4	5	7	8	10	13	16	20	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	2	3	4	5	6	8	10	12	12.0%
Air & Ocean Freight Management	4	5	7	8	10	12	14	17	10.2%
Customs Clearance & Port Handling	3	3	5	6	7	8	10	12	9.9%
Multimodal Transport Orchestration	2	2	3	4	5	6	7	9	10.6%
Kitting, Packaging & Labeling	2	3	4	4	5	7	8	10	10.4%
Reverse Logistics & Returns Processing	2	3	3	4	5	6	8	10	11.0%
Quality Control & Assembly	2	2	2	3	4	5	6	7	10.5%

Source: ZAFYYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 79.6 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

12.2.2 Argentina — Transport / Tech Mode Grid

Argentina — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	20	24	32	38	46	55	66	79	9.5%
Ocean Fleet & Chartering	11	13	18	21	25	30	35	42	9.2%
Air Cargo Capacity	7	8	11	14	17	20	24	30	10.3%
Rail & Intermodal	5	6	8	10	12	14	17	21	10.0%
EV Vans & Green Fleet	3	3	5	6	8	10	13	16	13.0%
Autonomous Freight Pilots	1	2	2	3	4	5	7	9	13.6%
WMS / TMS Software Stack	2	3	4	5	6	8	10	13	12.2%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Argentina pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

12.2.3 Argentina — Application Grids & Takeaways

Argentina — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	8	9	12	15	18	22	27	33	10.3%
Last-Mile Parcel Delivery	9	11	15	18	22	27	33	40	10.7%
Automotive & Heavy Machinery	9	10	13	16	19	22	26	31	9.0%
High-Tech & Electronics	7	8	11	13	16	19	23	28	9.9%
Cold Chain Biologics & Vaccines	4	5	6	8	10	12	15	19	11.1%
Medical Devices & Supplies	3	3	5	6	7	8	10	12	10.2%
Perishable Cold Chain (Fresh & Frozen)	4	5	6	8	9	11	14	17	10.6%
Dry Food & FMCG Distribution	3	4	5	6	7	8	10	12	9.4%
Hazmat Transport & Storage	2	3	4	5	6	7	8	10	9.6%
Project & Oversized Cargo	2	2	3	3	4	4	5	6	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Argentina strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

12.2.4 Argentina — Corridor, Policy & Investment Notes

Argentina diligence starts at the gateway layer: Buenos Aires, Rosario, Córdoba inland, Ezeiza air. Modeled 2026 spend of USD 79.6 billion (1.84% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Import licensing/FX controls, customs volatility, trucking union dynamics. These frictions can bend realized CAGR versus the Argentina growth tilt without changing the global spine. Demand hotspots center on Agri bulk, selective industrial, constrained import retail logistics. [3]

Competitive presence to monitor: Domestic trucking/3PLs; global forwarders on trade lanes. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Argentina: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Import licensing/FX controls.
- Use offering/mode/application grids as allocation maps, not audited books.

12.3 Rest of LATAM — Market Snapshot

Region: Latin America · Horizon 2021-2036 · Base-case spine

SIZE 2026

USD 150.3 BN

SIZE 2036

USD 393.6 BN

GLOBAL SHARE

3.47%

CAGR

10.1%

Rest of LATAM participates in the Global Logistics Market through corridor density, customs throughput, and contract-logistics penetration. Modeled 2026 spend is USD 150.3 billion (3.47% of global). Trade posture emphasizes port/airport gateway reliability, bonded warehouse capacity, and 3PL outsourcing maturity relative to regional peers.

Strategic Takeaways

- Rest of LATAM is a dedicated deep-dive leaf in the institutional geography chapter.
- KPI strip binds national pool to the global 2026/2036 spine.

12.3.1 Rest of LATAM — Service Offering Grid

Rest of LATAM — service offering grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight (FTL, LTL, Express)	19	23	30	36	43	52	62	74	9.4%
Ocean Freight (FCL, LCL)	11	13	16	20	23	28	33	39	9.1%
Air Freight (Express, General Cargo)	6	8	10	12	15	18	22	27	10.3%
Rail Freight & Intermodal	4	5	6	8	9	11	14	16	10.0%
Ambient Warehousing	14	17	22	26	32	38	46	55	9.6%
Temperature-Controlled / Cold Storage	7	9	13	16	19	24	30	37	11.4%
Automated Storage & Retrieval Systems (ASRS Nodes)	4	5	8	10	12	15	19	24	12.0%
Air & Ocean Freight Management	8	9	12	15	18	22	27	33	10.2%
Customs Clearance & Port Handling	5	7	9	10	13	15	18	22	9.9%
Multimodal Transport Orchestration	4	4	6	7	9	11	13	16	10.6%
Kitting, Packaging & Labeling	4	5	7	8	10	12	15	18	10.4%

Quality Control & Assembly	3	3	5	6	7	9	10	13	10.5%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Offering mix uses global L2 priors × national pool (absolute spine shares).
- National 2026 pool USD 150.3 BN anchors the leaf; CAGRs are tilt-differentiated then rebalanced to the national pool.

12.3.2 Rest of LATAM — Transport / Tech Mode Grid

Rest of LATAM — transport / tech mode grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Road Freight Fleet	38	46	60	72	86	104	124	149	9.5%
Ocean Fleet & Chartering	21	25	33	39	47	56	67	80	9.2%
Air Cargo Capacity	13	16	21	26	31	38	46	56	10.3%
Rail & Intermodal	9	11	15	18	22	27	32	39	10.0%
EV Vans & Green Fleet	5	6	9	12	15	19	24	31	13.0%
Autonomous Freight Pilots	2	3	5	6	8	10	13	16	13.6%
WMS / TMS Software Stack	4	5	8	9	12	15	19	24	12.2%

Source: ZAFITYS market databank 2027-2036

Key Visual Takeaways

- Mode values are scaled to the Rest of LATAM pool — not the global table.
- EV / autonomous / WMS-TMS rows carry above-spine growth tilts inside the national rebalance.

12.3.3 Rest of LATAM — Application Grids & Takeaways

Rest of LATAM — application vertical grid

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %
Omnichannel Fulfillment	14	18	24	29	35	42	52	63	10.3%
Last-Mile Parcel Delivery	17	20	28	34	42	51	62	76	10.7%
Automotive & Heavy Machinery	16	19	25	29	35	42	50	59	9.0%
High-Tech & Electronics	13	15	20	25	30	36	43	52	9.9%
Cold Chain Biologics & Vaccines	7	9	12	15	19	23	28	35	11.1%
Medical Devices & Supplies	5	7	9	11	13	16	19	23	10.2%
Perishable Cold Chain (Fresh & Frozen)	7	9	12	14	18	22	26	32	10.6%
Dry Food & FMCG Distribution	6	7	9	11	13	16	19	23	9.4%
Hazmat Transport & Storage	5	5	7	9	10	13	15	18	9.6%
Project & Oversized Cargo	3	4	5	6	7	8	10	12	9.2%

Source: ZAFTYS market databank 2027-2036

Strategic Takeaways

- Rest of LATAM strategic focus: corridor reliability, cold-chain compliance, 3PL outsourcing.
- Cold-chain and last-mile verticals carry higher growth tilts than heavy industrial inbound.
- Watch bonded capacity, last-mile density, and hazmat handling as yield levers.

12.3.4 Rest of LATAM — Corridor, Policy & Investment Notes

Rest of LATAM diligence starts at the gateway layer: Callao, Valparaíso/San Antonio, Cartagena, Buenaventura, Panama hub adjacency. Modeled 2026 spend of USD 150.3 billion (3.47% of global) is the allocation ceiling for the offering, mode, and vertical leaves above. [1]

Policy and operating overlays: Pacific Alliance facilitation, Panama hub competition, Andean customs variance. These frictions can bend realized CAGR versus the Rest of LATAM growth tilt without changing the global spine. Demand hotspots center on Mining/agri exports, Pacific manufacturing, urban parcel in large metros. [3]

Competitive presence to monitor: Regional 3PLs + global ocean/air networks. Practical checklist: (1) lane concentration into top gateways, (2) 3PL attach in retail and healthcare, (3) automation intensity in ambient vs cold warehouses, (4) ocean/air cycle exposure versus sticky contract-logistics ASPs, and (5) residual rest-of-region spillover outside named-country KPIs. [6]

Investment Takeaways

- Rest of LATAM: gateway reliability and compliance capacity lead TAM screens.
- Local bend factors: Pacific Alliance facilitation.
- Use offering/mode/application grids as allocation maps, not audited books.

13 Competitive Landscape & Profiles

Company market share (top 5 vs fragment)

Source: ZAFTYS competitive share priors · native Typst (CeTZ donut)

KEY VISUAL TAKEAWAYS

- ▶ Top five named operators ≈ 32.8% combined share.
- ▶ Fragment / others ≈ 67.2% — consolidation runway.
- ▶ Express integrators (DHL/UPS/FedEx) dominate brand density.

Competitor positioning matrix

Leaders

- DHL
- Kuehne + Nagel

Challengers

- UPS

Visionaries

- FedEx

Niche Players

- Maersk
- DB Schenker
- DSV

Axes: completeness of offering (→) × ability to execute / share (↑) · ZAFTYS positioning prior

Competitive structure remains fragmented: top-five named networks hold about one-third of modeled global share; the residual is a long tail of regional 3PLs, carriers, and brokers. Peer teasers and interview census inform methodology mix and vertical hotspots; share table remains a ZAFTYS prior pending claim-pack refresh. [6]

Company market share (base year)

Company	Share	Value
DHL	8.5%	368.4
UPS	7.2%	312.1
FedEx	6.8%	294.7
Maersk	5.5%	238.4
Kuehne + Nagel	4.8%	208.0
Fragment / Others	67.2%	2,912.6

Source: ZAFTYS competitive share priors [1]

Key Visual Takeaways

- DHL / UPS / FedEx anchor express + contract density [6].
- Maersk and K+N lead ocean/air forwarding orthodoxy.
- Fragment share (~67%) is the M&A and niche battlefield.

20x8 capability footprint (excerpt — 15 profiled operators)

Operator	Express Parcel	Ocean Forwarding	Air Forwarding	Contract Logistics	Cold Chain	Last Mile	Customs Brokerage	Digital Twin / Visibility
DHL / Deutsche Post	Low	Med	Low	High	Low	Med	High	Med
UPS	Low	Med	Low	High	High	High	Med	High
FedEx	Med	Low	Med	Med	High	Low	High	Low
Maersk	Med	Low	Med	Low	Med	Low	High	High
Kuehne + Nagel	Low	High	Low	High	Med	High	Low	Low
DB Schenker	Low	Med	High	High	High	Low	High	High
DSV	High	High	Med	Low	Low	High	Low	Low

GXO	Low	Med	High	Low	High	Low	High	Med

Source: ZAFTYS capability priors (directional) [6]

13.1 DHL / Deutsche Post

OPERATOR PROFILE

DHL / Deutsche Post

HEADQUARTERS

Bonn, Germany

REVENUE SCALE

Deutsche Post DHL Group ~EUR 80B+ group revenue (recent FY)

DIVISIONS

Express, Global Forwarding, Supply Chain, eCommerce

Strategic focus: Integrated express + contract logistics; network density in Europe/APAC

Network posture: Global air/road hubs; DHL Express + DSC warehousing footprint

Geographic emphasis: Europe core; strong APAC and Americas express; global forwarding stations

Relative to the fragmented residual (~67% modeled share), DHL / Deutsche Post competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Supply Chain contract renewals, eCommerce Solutions mix, and Express premium vs economy yield split

Strengths & Moats

Unmatched express + contract logistics combination; deep Europe/APAC hub density; strong pharma cold-chain franchise

Operational Risks & Exposure

Labor cost inflation in EU hubs; parcel yield pressure from regional CEP challengers; air capacity cycle exposure

13.2 UPS

OPERATOR PROFILE

UPS

HEADQUARTERS

Atlanta, United States

REVENUE SCALE

~USD 90B+ group revenue (recent FY)

DIVISIONS

US Domestic Package, International, Supply Chain & Freight

Strategic focus: Parcel density in North America; B2B/B2C last-mile and freight

Network posture: Extensive US air/ground sortation; UPS Freight / brokerage adjacency

Geographic emphasis: North America dominant; selective international express and forwarding

Relative to the fragmented residual (~67% modeled share), UPS competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: US ground yield management, healthcare vertical attach, and international operating margin recovery

Strengths & Moats

US ground density and B2B industrial parcel franchise; healthcare logistics capabilities; international alliance reach

Operational Risks & Exposure

US volume mix shift toward lower-yielding residential; integration/divestiture noise around freight assets; union labor negotiations

13.3 FedEx

OPERATOR PROFILE

FedEx

HEADQUARTERS

Memphis, United States

REVENUE SCALE

~USD 85B+ group revenue (recent FY)

DIVISIONS

FedEx Express, Ground, Freight, Services

Strategic focus: Time-definite express and ground parcel; FedEx Freight LTL

Network posture: Global air express hubs; dense US Ground / Freight network

Geographic emphasis: US-centric ground/freight; global Express air network

Relative to the fragmented residual (~67% modeled share), FedEx competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Network optimization savings realization, Express vs Ground mix, and Freight LTL pricing discipline

Strengths & Moats

Time-definite air express brand; dense US Ground network; FedEx Freight LTL scale

Operational Risks & Exposure

Express overcapacity in softer air markets; DRIVE cost-takeout execution risk; competitive overlap with UPS on US ground

13.4 Maersk

OPERATOR PROFILE

Maersk

HEADQUARTERS

Copenhagen, Denmark

REVENUE SCALE

A.P. Moller-Maersk ocean + logistics franchise (multi-ten USD B)

DIVISIONS

Ocean, Logistics & Services, Terminals

Strategic focus: End-to-end ocean + inland logistics integration

Network posture: Global container liner network; inland warehousing / forwarding

Geographic emphasis: Global east-west and north-south trades; logistics denser in Europe/APAC/Americas gateways

Relative to the fragmented residual (~67% modeled share), Maersk competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Ocean vs Logistics & Services profit mix, contract vs spot exposure, and inland product attach rates

Strengths & Moats

Ocean capacity control plus inland logistics attach; terminal stakes; integrator narrative with shippers

Operational Risks & Exposure

Container freight rate cyclicity; logistics integration execution; competition from pure-play forwarders on service flexibility

13.5 Kuehne + Nagel

OPERATOR PROFILE

Kuehne + Nagel

HEADQUARTERS

Schindellegi, Switzerland

REVENUE SCALE

~CHF 20B+ group revenue (recent FY)

DIVISIONS

Sea Logistics, Air Logistics, Road, Contract Logistics

Strategic focus: Asset-light forwarding leadership; contract logistics growth

Network posture: Global seafreight / airfreight stations; contract warehouses

Geographic emphasis: Truly global station network with Europe HQ gravity

Relative to the fragmented residual (~67% modeled share), Kuehne + Nagel competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Sea Logistics gross profit per TEU, Air perishables/pharma mix, and contract logistics conversion

Strengths & Moats

Sea/air forwarding scale with high service control; pharma and high-tech vertical depth; contract logistics expansion

Operational Risks & Exposure

Sea/air volume cyclicalities; margin compression when rates normalize; IT/platform investment race

13.6 DB Schenker

OPERATOR PROFILE

DB Schenker

HEADQUARTERS

Essen, Germany

REVENUE SCALE

Deutsche Bahn logistics arm (multi-ten EUR B)

DIVISIONS

Land Transport, Air/Ocean Freight, Contract Logistics

Strategic focus: European land freight density; air/ocean forwarding

Network posture: European road/rail corridors; global forwarding stations

Geographic emphasis: Europe core land; global air/ocean forwarding

Relative to the fragmented residual (~67% modeled share), DB Schenker competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Ownership transition outcomes, land transport yield, and contract logistics automation spend

Strengths & Moats

European land transport density; multimodal rail adjacency; contract logistics campuses

Operational Risks & Exposure

Ownership/transaction overhang; European industrial demand softness; road cost inflation

13.7 DSV

OPERATOR PROFILE

DSV

HEADQUARTERS

Hedehusene, Denmark

REVENUE SCALE

Multi-ten USD B after large-scale M&A integration cycles

DIVISIONS

Air & Sea, Road, Solutions (contract logistics)

Strategic focus: Scale forwarding platform; post-acquisition network consolidation

Network posture: Global air/sea forwarding; European road + warehouse solutions

Geographic emphasis: Europe-heavy road/solutions; global air & sea

Relative to the fragmented residual (~67% modeled share), DSV competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Synergy delivery timelines, Solutions EBIT margin, and air/sea volume retention post-deal

Strengths & Moats

M&A integration playbook; air/sea scale; Solutions warehouse growth

Operational Risks & Exposure

Integration complexity and cultural overhang; customer attrition during network merges; leverage from deal cycles

13.8 C.H. Robinson

OPERATOR PROFILE

C.H. Robinson

HEADQUARTERS

Eden Prairie, United States

REVENUE SCALE

~USD 17B+ group revenue (recent FY)

DIVISIONS

NAST truckload/LTL brokerage, Global Forwarding, Managed Solutions

Strategic focus: North American freight brokerage + managed transportation

Network posture: Brokerage capacity marketplace; Navisphere digital booking

Geographic emphasis: North America core; global forwarding stations

Relative to the fragmented residual (~67% modeled share), C.H. Robinson competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: NAST net revenue per load, tech-enabled productivity, and Global Forwarding share gains

Strengths & Moats

NAST brokerage scale; shipper TMS adjacency via managed solutions; digital quoting velocity

Operational Risks & Exposure

Truckload gross-profit cyclicity; carrier disintermediation via digital freight; forwarding competition from asset-backed integrators

13.9 Geodis

OPERATOR PROFILE

Geodis

HEADQUARTERS

Paris, France

REVENUE SCALE

SNCF logistics arm (multi-ten EUR B)

DIVISIONS

Freight Forwarding, Contract Logistics, Distribution & Express

Strategic focus: European contract logistics + global forwarding

Network posture: European warehouse footprint; air/ocean stations

Geographic emphasis: Europe-led with selective Americas/APAC forwarding

Relative to the fragmented residual (~67% modeled share), Geodis competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Contract logistics occupancy/productivity, forwarding yield, and e-commerce distribution density

Strengths & Moats

European contract logistics depth; automotive and retail verticals; SNCF multimodal adjacency

Operational Risks & Exposure

European industrial softness; competitive pressure from DSV/K+N on forwarding; wage inflation in warehouses

13.10 Sinotrans

OPERATOR PROFILE

Sinotrans

HEADQUARTERS

Beijing, China

REVENUE SCALE

Multi-ten USD B China logistics franchise

DIVISIONS

Agency/freight forwarding, logistics, e-commerce

Strategic focus: China corridor density and agency network

Network posture: PRC ports/airports; Belt-and-Road adjacency

Geographic emphasis: Greater China core; selected international corridors

Relative to the fragmented residual (~67% modeled share), Sinotrans competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Agency vs logistics mix, cross-border e-commerce flows, and international partner alliances

Strengths & Moats

China port/airport agency density; domestic logistics reach; Belt-and-Road corridor positioning

Operational Risks & Exposure

China trade-policy swings; SOE governance constraints; competition from global forwarders on multinational accounts

13.11 Nippon Express

OPERATOR PROFILE

Nippon Express

HEADQUARTERS

Tokyo, Japan

REVENUE SCALE

Multi-ten USD B NX Group

DIVISIONS

Japan logistics, global forwarding, heavy haul

Strategic focus: Japan domestic density + APAC forwarding

Network posture: Japan road/rail; global air/ocean stations

Geographic emphasis: Japan core; expanding global NX brand footprint

Relative to the fragmented residual (~67% modeled share), Nippon Express competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Overseas forwarding growth, Japan warehouse automation, and project cargo pipeline

Strengths & Moats

Japan domestic logistics density; heavy-haul / project cargo; APAC forwarding quality

Operational Risks & Exposure

Japan demographic labor constraints; yen/FX translation; slower domestic volume growth

13.12 XPO

OPERATOR PROFILE

XPO

HEADQUARTERS

Greenwich, United States

REVENUE SCALE

Multi-ten USD B LTL-focused franchise

DIVISIONS

LTL, brokered transportation adjacency

Strategic focus: North American LTL network modernization

Network posture: US/Canada LTL service centers

Geographic emphasis: United States and Canada LTL corridors

Relative to the fragmented residual (~67% modeled share), XPO competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: LTL yield/ton, on-time service metrics, and technology-enabled door density

Strengths & Moats

LTL network density and yield management tools; service center modernization

Operational Risks & Exposure

LTL pricing cycles; industrial shipment softness; CapEx intensity of network upgrades

13.13 J.B. Hunt

OPERATOR PROFILE

J.B. Hunt

HEADQUARTERS

Lowell, United States

REVENUE SCALE

Multi-ten USD B intermodal + dedicated

DIVISIONS

Intermodal, Dedicated, Final Mile, Highway Services

Strategic focus: US intermodal conversion and dedicated fleets

Network posture: Class I rail partnerships; US truckload capacity

Geographic emphasis: United States intermodal and highway corridors

Relative to the fragmented residual (~67% modeled share), J.B. Hunt competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Intermodal volume vs highway, dedicated contract renewals, and final-mile utilization

Strengths & Moats

Intermodal conversion franchise; dedicated contract fleets; final-mile big-and-bulky adjacency

Operational Risks & Exposure

Rail service variability; truckload rate competition; consumer durable final-mile cyclical

13.14 Schneider

OPERATOR PROFILE

Schneider

HEADQUARTERS

Green Bay, United States

REVENUE SCALE

Multi-ten USD B truckload / intermodal

DIVISIONS

Truckload, Intermodal, Logistics

Strategic focus: North American asset + logistics mix

Network posture: US/Mexico corridors; dedicated fleets

Geographic emphasis: US domestic and US–Mexico cross-border

Relative to the fragmented residual (~67% modeled share), Schneider competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: Dedicated vs network mix, Mexico volume, and logistics operating ratio

Strengths & Moats

Asset truckload + intermodal balance; Mexico cross-border expertise; logistics brokerage adjacency

Operational Risks & Exposure

Truckload rate cycles; driver availability; Mexico corridor policy/security frictions

13.15 GXO

OPERATOR PROFILE

GXO

HEADQUARTERS

Greenwich, United States

REVENUE SCALE

Multi-ten USD B pure-play contract logistics

DIVISIONS

Contract logistics, reverse logistics, automation

Strategic focus: Warehouse automation and e-commerce fulfillment

Network posture: Global warehouse campus footprint

Geographic emphasis: North America and Europe warehouse campuses; selective APAC

Relative to the fragmented residual (~67% modeled share), GXO competes on gateway control, contract-logistics productivity, cold-chain compliance, and digital visibility rather than list price alone.

Cross-check capability scores in the chapter footprint matrix and the top-five vs fragment share table when sizing partnership or M&A screens.

Institutional watchpoints: New-win pipeline, automation attach on renewals, and reverse-logistics profitability

Strengths & Moats

Pure-play contract logistics focus; automation partnerships; reverse logistics and e-commerce density

Operational Risks & Exposure

Client concentration in retail/e-commerce; warehouse labor inflation; automation ROI timing

14 Exhibit Reading Guide

Leaf pages pair a year-grid with a CeTZ mini trajectory and an analyst lessons box so single-segment exhibits stay publication-dense. Country corridor notes carry region-tuned regulatory citations (FMC, EU ETS, IMO).

Competitive share and capability matrices are directional priors: use them for screening, then refresh with claim-pack filings before investment memos. Scenario bands in the next section are envelopes, not audited forecasts.

Key Visual Takeaways

- Tables are bank-grounded; charts visualize the same spine path.
- Inline [n] markers map to the References list at the back of the report.
- Fragment share (~67%) is the primary M&A and niche battlefield.

15 Share Prior Disclosure

Service and application L2 shares are institutionally prior-weighted (transport ~42%, warehousing ~28%, forwarding ~18%, VALS ~12%; retail/e-com leads applications). L3 Core vs Premium/Express leaves use declining weights. Growth tilts differentiate CAGRs; multi-row grids rebalance to the pool each year.

Key Visual Takeaways

- Equal residual splits are no longer used for named L2 leaves.
- Country mode/application grids scale absolute national pool × mix priors.
- Refresh priors when claim packs deliver audited segment evidence.

16 Scenario Bands & Sensitivity Notes

Institutional readers should treat the 10.1% spine CAGR as the base case, not a point guarantee. Bull cases densify when e-commerce last-mile, cold chain, and APAC infrastructure CAPEX run above prior; bear cases hit when ocean/air cycles collapse, carbon costs spike without pass-through, or labor shortages cap warehouse throughput.

Illustrative scenario endpoints (global spine, USD billion)

Scenario	2026	2030	2036	CAGR %
Bear	4334	5800	8200	6.6%
Base	4334	6370	11350	10.1%
Bull	4334	7100	13800	12.3%

Source: ZAFTYS market databank 2027-2036

Key Visual Takeaways

- Bear/bull bands are decision-support envelopes, not audited forecasts.
- Segment tilts (cold, EV, WMS) amplify bull cases; ocean/road volume shocks amplify bear cases.
- Country policy frictions can move a market across bands without changing the global spine.

17 Appendix & References

Databank method: pin 2026 at USD 4,334.3 BN; compound to 2036 endpoint USD 11,350.0 BN; backfill 2021-2025 on the same CAGR path; allocate L2/L3/country pools via normalized priors with segment growth tilts; rebalance multi-row grids each year so row sums match the pool. [2]

Country year grid (all 21 markets)

Segment	2021	2023	2026	2028	2030	2032	2034	2036	CAGR %

Glossary

- **CAGR:** Compound Annual Growth Rate.
- **3PL:** Third-party logistics / contract logistics.
- **4PL / LLP:** Lead logistics provider / integrator.
- **ASRS:** Automated storage and retrieval systems.
- **VALS:** Value-added logistics services.
- **FTL / LTL:** Full truckload / less-than-truckload road freight.
- **FCL / LCL:** Full container load / less-than-container load ocean freight.
- **TMS / WMS:** Transportation / warehouse management software stacks.
- **Cold chain:** Temperature-controlled transport and storage for perishables and biologics.
- **Bonded warehouse:** Customs-supervised storage delaying duty until goods enter free circulation.
- **Last mile:** Final delivery leg from depot/hub to consignee or consumer.
- **Intermodal:** Freight moving under one contract across two+ modes (often rail+truck).
- **Hazmat:** Dangerous goods requiring specialized handling, packaging, and documentation.
- **EU ETS:** EU Emissions Trading System — carbon cost overlay for covered logistics legs.
- **IMO:** International Maritime Organization — ocean safety and emissions rules.
- **FMC:** U.S. Federal Maritime Commission — ocean carrier/shipper oversight.
- **Spine:** ZAFTYS pinned global market-size path (2026 base → 2036 endpoint).
- **Growth tilt:** Segment-specific CAGR multiplier vs the institutional spine, rebalanced in multi-row grids.
- **Fragment share:** Residual market not held by named top operators in the competitive table.
- **Gateway:** Port, airport, or border node concentrating customs and multi-modal throughput.
